Deceptive Attack

Targeted Attack

Aim for a specific hit location (penalty per chart). Wound effects apply there. Repeating same target → +1 to their defence on 3rd+ try.

Telegraphic Attack

M+R

+4 hit; target gets +2 defence. Stacks w/ Rapid Strike, Targeted, Committed. Contradicts Deceptive.

Ⓒ COUNTER-ATTACK & PUNISHING DEFENCES

→ defences that strike back or set up your next attack with a penalty on the foe.

Riposte

MA

M

[armed/unarmed] On a parry, accept −1 to −4 off your Parry (floor 8 before Enh Parry & CR); success → your first attack next turn on that foe forces them to defend at the SAME penalty you took (take −3 → they're at −3). Full penalty hits the matching defence (parried weapon→Parry, shield→Block, unarmed→Dodge); half (round down) on their other defences. Riposte IS a Deceptive Attack — don't stack Deceptive.

*

*

Counterattack

MA

M+R

[armed/unarmed] Hard tech, default skill −5. After a successful Dodge/Parry/Block → your next attack on that foe (this turn or next) penalises their defence by a flat −2 (no defensive risk like Riposte, but smaller & fixed). Can't combine with Riposte same turn.

*

*

Stop Hit

MA

M

[armed/unarmed] Wait variant. Both attack on trigger; lower-margin attacker defends at −1 (−3 if parrying with the attacking weapon). Stops melee charges.

*

*

Stop Thrust

M

[thrust wpn / punch] Wait variant vs a charging foe. +1 dmg per 2 m of their Move, max +3. Knockdown interrupts their attack.

*

*

Aggressive Parry

MA

M

[armed OR unarmed] Parry −2 → strike the attacking limb (uses their HP for crippling). Unarmed = thrust crushing; armed = your weapon's thrust (sabers cut clean). Crit fail: self-injury.

*

*

Hand-Clap Parry

MA

M

[UNARMED only] Karate −2; bare hands parry AND grapple a small weapon (knives, fists). Needs a free hand. Not polearms / sabers.

ATK MAKING AN ATTACK — THE UNIVERSAL ROLL

Every attack is 3d6, roll-under. Work out your effective skill, roll 3d6, and you hit if the roll is ≤ that number. Low is good — a 3 or 4 is always spectacular.

Effective skill

Base weapon / unarmed skill + bonuses − penalties (posture, Deceptive, range, cover, light...). Melee mods here; ranged → Page 2.

Hit / miss

Roll ≤ skill = hit. Roll > skill = miss.

Margin

Effective skill − your roll. Drives burst hits, Feints & locks.

Who defends

Target gets one free active defence per attack (a Reaction). Extra defences that turn: −4 each (−2 if trained).

Crit ranges

Crit hit: 3-4 always · 5 if skill ≥15 · 6 if skill ≥16. Crit miss: 18 always · 17 if skill ≤15. Full table →

CRIT CRITICAL SUCCESS & FAILURE

Crit success:

nat 3-4 always; nat 5 if skill ≥ 15; nat 6 if skill ≥ 16.

Crit failure:

nat 18 always; nat 17 if skill ≤ 15; margin of failure ≥ 10.

Defence crit:

auto-defend + attacker is off-balance (−2 DX, defences & skills until they Ready). Crit Parry = free Aggressive Parry to attacking limb; Crit Dodge +1 m free step; Crit Block drives attacker back. Crit fail (def): auto-fail + attacker may roll Crit Hit.

Skill/HT/Will/IQ crit:

success = ideal/quick resist; fail = worst/lingering (2x FP on Force SW).

HOUSE Crit Hit → Counter-Crit Defence.

On a critical hit the defender MAY still attempt an active defence, but it succeeds ONLY on a critical defence of its own (nat 3-4; 5 at def ≥ 15; 6 at def ≥ 16) — else the hit lands. DR still applies; damage rolled normally then modified per the row. Extra defences take the multi-def penalty & each needs its own crit.

RNG RANGED — MODIFIERS, COVER & BLASTER FIRE		
Aim & Acc	+Acc on the shot after Aim; extra Aim +1 each, cap +2 over Acc. Move & Attack: skill cap, -2 or -Bulk (worse).	
Recoil & Bulk	-Rcl per shot after the first in a turn. -Bulk firing from M&A, snap-shot w/o Aim, or close combat.	
Target Move	-1 cross-walk, -2 cross-run, -3 sprint / erratic. (Target SM & range from the To-Hit table.)	
Concealment	Smoke / dim / fog -2 to -4 (to-hit only). Pitch dark: Wild Swing cap 9 / Hearing. Hurt / heavily hurt: -3 / -4 to all skills.	
Suppression HOUSE	RoF 5+ into a hex / doorway / short line (no specific target). Anyone in or crossing must Dodge vs your effective skill or be hit . Consumes the full burst.

Brick wall	DR 8-15 cracks under fire	
Concrete wall	DR 24-100 heavy weapons eventually	
Permacrete / durasteel SW	DR 50-200 structural	
Hardened steel / blast door	DR 70+ heavy weapons / explosives	
RATE OF FIRE — BURST HIT BONUS & RESOLUTION		
ROF	BONUS	RESOLUTION
1-4	+0	On a hit, bolts connecting = [margin ÷ Rcl] + 1, capped at RoF. Defender rolls one defence; further incoming hits use the multi-def penalty (RAW -4 each). Stun bolt: dmg to FP (fat); FP ≤ 0 → HT to act; ≤ -1×FP → KO. Sealed/hardened armour may stop it.
5-8	+1	
9-16	+2	
17-49	+3	
50-99	+4	
100+	+5 /2x	

EX WORKED EXAMPLE — CARBINE BURST
Blaster carbine, RoF 10 , Rcl 2 , skill 14. Target at 10 m (–4) and walking (–1) → effective skill 9 , plus the +1 RoF-10 burst bonus = 10 . Roll 8 → hit; margin = 10 – 8 = 2 . Bolts that connect = 1 + [2 ÷ 2] = 2 bolts . Roll each bolt's damage on its own; subtract the target's DR (+ the weapon's AD) from each.

BND RANGE BANDS — WHAT EACH DISTANCE FEELS LIKE		
The to-hit penalty comes from the Range table at left. These bands tell you how a fight at that distance actually plays. 1 hex = 1 m .		
RANGE	PEN.	BAND & HOW IT PLAYS
0–2 hex	0	Point-blank. Close-combat & Bulk penalties apply; most defences available.
3–5 hex	–2/3	Brawling distance. Pistols ideal; long arms suffer Bulk up close.
7–10 hex	–3/4	Room-to-room. Burst fire devastating; cover is everything.
15–20 hex	–5/6	Hall / open room. Where most blaster fights settle. Carbines = rifles.
30–50 m	–7/8	Outdoor close. Aim essential; pistols fall off past 30 m.
70–100 m	–9/10	Medium. Rifle territory; multi-turn Aim. Many pistols hit their ½D here.
Farther: 150 m –11 · 200 m –12 · 300 m –13 · 500 m –14 · 1 km –16.		

DEF DEFENDING AGAINST RANGED	
You must see it	No defence against a shot you're unaware of (rear/surprise). Aware → you may react.
Dodge / dive	Dodge the shot, or dive for cover / drop prone (Movement Defence) to break line-of-fire.
No Parry/Block	You can't Parry or Block a bolt — except a lit lightsaber's Deflect (and a few Force powers).
Cover vs concealment	Cover = DR off the damage. Concealment = –to-hit only.

RNG+ RANGED-ONLY RULES	
Forbidden w/ ranged	No Rapid Strike, Deceptive, Feint, Beat, Ruse or Combination. For more hits use Rate of Fire (bursts) — not melee tricks.
Move and Attack	Full Move + fire: –2 or the weapon's Bulk , whichever is worse. (The skill-9 cap is melee-only.)
Into a melee	–4 to single out a target in a scrum; miss badly → you may hit a random fighter in that hex (GM call).
Gun at arm's reach	You can fire at reach C, but you can be parried, grabbed or grappled ; long arms suffer Bulk. Pistols are the close choice.
Aim	+Acc on next turn's shot; +1 per extra Aim (cap +2). Brace & stay still: a further +1 . Lose all Aim if you move or get hit.
Two guns	One per hand: off-hand at –4 without Ambidexterity.

½D HALF-DAMAGE & MAX RANGE · COVER VS CONCEALMENT	
½D range	Listed on each weapon card. Past ½D, halve the damage — the bolt has bled off, the slug has slowed.
Max range	Beyond it the shot cannot reach . Most blasters: ½D ≈ ⅓ of Max.
Cover	Physical DR between you and the bolt. Subtract cover DR from the damage (see DR table). Does NOT change the to-hit roll.
Concealment	Can't be seen clearly (smoke, dark, fog): –to-hit only , gives NO DR. Total whiteout → attacker uses Wild Swing (skill 9).
Partial cover	Only part of you exposed → attacker eats the hit-location penalty for that part; cover DR still applies if the bolt clips the barrier.

RES	DAMAGE RESOLUTION — STEP BY STEP
1	Roll basic damage from the weapon (e.g. 2d+1). This number drives both injury and knockback.
2	Subtract armour: penetration = damage – (DR ÷ Armour Divisor). If DR ≥ that, nothing gets through (see Blunt Trauma). AD scales the armour, not the roll: standard AD 1 = full DR · heavy blaster / military AD 2 = half DR · ion AD 5 (anti-droid) · disruptor AD 10 · lightsaber AD ∞ = ignores DR (vs non-cortosis).
3	Apply wound multiplier to penetration by damage type & location (see Damage Types): injury = penetration × mult. Vitals x3, Skull x4, etc.
4	Resolve location effects: crippling, major wound (> HP/2 → HT vs stun + knockdown), bleeding / cauterisation, knockback (below & in Hit Location).
5	Subtract injury from HP and apply shock, then check Reeling / Consciousness / Death as thresholds are crossed.
Worked: bolt rolls 8, target DR 6, weapon AD 2 → eff DR 3 → pen 5 → tib-burn x1 = 5 HP. To Vitals: x3 = 15 HP (major wound).

Tight-Beam tib-burn	x1	x1	x1	SW Blaster bolts & lasers. Focused beam qualifies as a penetration type — reaches Eye (x4) / Vitals / Heart like imp/pi. Standard AD 1 ; heavy / military AD 2. Cauterises (half-rate bleed).
Corrosion cor	x1	x1	x1	Acid. Erodes DR –1 per 5 dmg (permanent).
Crushing cr	x1	x1	x1	Blunt trauma. x2 vs neck (snap/strangle). Easier knockback (full).
Cutting cut	x1.5	x1	x1.5	Severs limbs on a crippling injury. Knockback at half.

Major Wound (> HP/2)	HT. Fail = stunned (lose turn, def -4, HT each turn); crit fail = unconscious. If standing, HT or knocked prone.
Reeling (HP ≤ ½)	Move & Dodge halved (round up) until healed above ½.
Consciousness (HP ≤ 0)	HT at start of each turn. Fail = unconscious. Success = may still act.
Death checks	HT at -1x, -2x, -3x, -4x HP or die (crit fail = die). Hard to Kill bonus. ≤ -5x = auto-dead; ≤ -10x = body destroyed.
FP fatigue	FP ≤ ½: Move/Dodge halved, ST halved for dmg, skills -2. FP ≤ 0: HT to act, DX/IQ halved. FP ≤ -1x = unconscious.
Mental stun	Lose next turn, def -4, IQ each turn to recover (CR +6, never freezes in surprise).
SPECIAL DAMAGE OUTCOMES	
Knockback	Cr (full) & cut (half) only; not imp/pi. 1 m back per full multiple of (target ST-2) in basic damage (before wound mult), whether or not it penetrates DR. Knocked 2+ m → roll best of DX/Acrobatics/Judo or fall prone (-1/m beyond 1st). Into a wall: 1 HP cr per metre not travelled.
Blunt Trauma	Flexible armour (vest, mesh, leather) that stops a hit still transmits 1 HP crushing per 5 pts stopped (round down), ignoring DR. Rigid armour (plate, ceramic) does not. Not from energy/burn.
Bleeding	Triggers: Neck/V/A, or any cut > ½ HP to a limb. Each turn HT or lose 1 HP ; First Aid roll stops it. Lasts the engagement if untreated.
Cauterisation SW	Lightsaber wounds: full dmg & all effects but no bleeding ; any sever/cripple is permanent (Force-heal/prosthetic only). Blaster bolts bleed at half rate; slugthrowers bleed normally.

STS	STATUS EFFECTS — QUICK REFERENCE
Stunned	No actions; defences -4. Recover: HT roll (physical) or IQ (mental) at end of each turn. Combat Reflexes +6 vs mental freeze.
Shock	-1 per HP lost (cap -4) to DX/IQ skills on your <i>next turn only</i> . No defences. High Pain Threshold negates.
Knocked down	Major wound / Face / Skull hit: HT roll or fall prone & drop what's held (fail by 5+: also stunned). Standing = a Change Posture maneuver.
Bleeding	Vitals/Neck wounds: HT each turn or lose 1 HP until tended (First Aid) — lightsaber & blaster burns cauterise (no bleed).
On Fire SW	1d-3 burn per turn (min 1) until out: drop & roll (DX) or smother (Ready action). Sealed armour protects until its DR is breached; fire fields burn 1d/turn.
Poisoned	HT roll to resist (at the toxin's listed number); fail = listed damage, often delayed or staged. Antitox injector: +3 HT & neutralises one known toxin. Sealed armour stops contact gas; cloth doesn't.
Electrified / Stun bolt	Stun settings & sonic: aff HT-N — fail = stunned (recover as above); damage goes to FP not HP . Electrified surfaces/shock-whips: HT or stunned + 1 FP per contact turn.
Suffocating	HT every 15 sec ; each fail = 1 FP. At 0 FP: 1 HP/turn until air. Vacuum adds 1d-1 burn per 5 sec (unsealed).
Droids	No shock, no bleeding, no FP — full effect until destroyed. Droid "stun" = ion stagger : lose 1 turn, defences -4, HT each turn to reboot.
Sheet automation: conditions toggle on the Combat tab and feed their penalties into the Skill Roller automatically.	

HOUSE	SABER LOCK & LIGHTNING LOCK
Forms two ways: (1) On purpose — declare as your Attack if you parried them (or they parried you) last turn; the foe may break away by retreating a hex unless walled / pinned. (2) By accident — when two sabers clash (or a saber & a saber-resistant blade: beskar / cortosis / phrik / songsteel), roll 1d; on a 6 the blades catch . Ordinary blades are sheared — they never lock.	
EACH TURN, PICK ONE	EFFECT
Force / sword contest	QC of your Force attribute (ST Torment · DX Velocity · Will Vessel · HT Tempered) — non-Force: higher of ST/DX. +1 per 2 ST over foe ; +1 two-handed; +1/pt SM; -2 bad footing. Not Lightsaber skill — the saber's up-to-+20 would auto-win.
Break away	Spend your turn, step out, end the lock. If the foe did not also break, they get the <i>Bend-the-guard</i> result on you as you turn aside.
Bear down	All-Out push: +2 to the contest this turn, but no active defence until your next turn.
Win by 1-2 bend guard (foe -2 defences vs you / shove 1 m) · 3-5 break guard (free attack +2 / shove + knockdown / disarm +2) · 6+ overpower (knockback + prone, or free attack +4) · tie blades stay locked, both -2 vs everyone else. Crit fail: fall prone, foe gets the 6+ result.	
SW Lightning Lock: a lit saber always parries Force Lightning; a successful parry forms a lock instead of scattering it. Sustained QC each turn — attacker rolls Force Lightning skill, defender rolls their Force attribute (+1 Tempered Blade, or Tutaminis if trained). Both pay FP (defender 1 FP per 4 dmg held). Defender wins by 6+ → redirect the storm at the caster (-2 their defence); loses by 3+ → full damage. Either may break off (defender Dodges clear).	

AOE EXPLOSIONS & AREA OF EFFECT

6d GRENADE — FALLOFF BY HEX

FALLOFF full ÷3 ÷6 ÷9

PRE-COMPUTED FALLOFF — AVERAGE DAMAGE AT EACH HEX							
CENTRE	HEX 0	1 (+3)	2 (+6)	3 (+9)	4	5-6	TYPICAL WEAPONS
3d (10)	10	~3	~2	~1	—	—	Cryoban, incendiary, sonic grenade
6d (21)	21	~7	~3	~2	~1	—	Frag, plasma / concussion, ion grenade
6d×2 (42)	42	~14	~7	~5	~3	~2	Proximity mine, wrist rocket

GRN GRENADES, CHARGES & MINES — AT A GLANCE

(N) after the dice = armour divisor . ex = explosive (uses falloff, left). [Nd] frag = secondary shrapnel, pi (ignores shields). Timing: end-of-turn = goes off at the turn's close · fixed = can't be rushed · instant = on landing. Full list on the sheet & compendium Codex VI. SW			
ITEM	BLAST (CENTRE)	RADIUS	TIMING
Fragmentation grenade	6d(1) cr ex + [3d] frag	3 m	end-of-turn
Concussion grenade	5d cr ex (knockback)	3 m	end-of-turn
Plasma / concussion	6d(2) burn ex	3 m	end-of-turn
Thermal detonator	6d×3(2) burn ex	4 m	instant
Ion grenade (droids)	6d(5) ion ex	3 m	2-sec
Stun grenade	HT–4 aff (stun 1d t)	3 m	end-of-turn
Flash-bang	HT–4 aff (blind+deaf 1d t)	4 m	end-of-turn
Smoke grenade	concealment cloud	4 m	end-of-turn
Cryoban grenade	4d(1) cr + slow	3 m	2-sec
Incendiary grenade	4d burn ex + fire field	3 m	2-sec
Gas grenade (acid)	3d cor/turn cloud	4 m	2–3-sec
Sonic grenade	5d(0.5) son ex + HT–3 stun	4 m	2-sec
Seismic charge	6d×3(2) cr ex (huge)	6 m	3-sec arm
Plasma/thermal charge	6d×4(3) burn ex	5 m	3-sec arm

The falloff rule. An explosion deals its **full listed damage at the centre hex**, then weakens as it spreads: **damage = centre ÷ (3 × hexes away)**. So 1 hex out is ÷3, 2 hexes ÷6, 3 hexes ÷9. The table below is pre-divided — just read across to the victim's hex.

Then armour. Apply the weapon's armour divisor & the victim's DR **after** falloff. Concussion is **cr** (plate resists); frag & shrapnel are **pi** (ignore shields); plasma/thermal is **burn** (energy). **SW**

VEL VELOCITY & “SMASH” DAMAGE — FALLS, SLAMS & COLLISIONS

Speed and mass hurt. These are all crushing and all cause knockback . 1 hex = 1 m , 1 turn = 1 s , so hexes-per-turn = m/s.						
FALLING — 1D–3 CRUSHING PER METRE FALLEN						
FALL	2 M	5 M	10 M	20 M	50 M	100 M+
Damage (cr)	2d–6	5d–15	10d–30	20d–60	~25	~50
Typical	~1	~3	~5	~10	~25	60+ cap
Soften it: best of DX , Acrobatics or Judo — success halves, critical quarters. Into water: half (low falls); clean entry (Acrobatics/Swim) halves again. Terminal velocity ~200 m/s → 200 m+ ≈ max.						
SLAM, SHOVE & CHARGE (ON FOOT)						
Slam / charge	Move and Attack into a foe (to-hit skill capped at 9 , or DX+2). Damage = your thrust crushing . Both of you can be knocked down.					
Slam stance SW	+3 to hit & knockback, counts ST +4 for slam damage, and may stun a smaller foe . A rocket-pack burn-charge adds +2 .					
Shove	Quick Contest of ST — win = push the foe back 1 hex (more on a big margin). Force Push does this at range.					
VEHICLE RAM & COLLISION — (HP ÷ 5) × (RELATIVE SPEED IN HEX/TURN ÷ 10)						
VEHICLE HP \ SPEED	10	20	40	80		
40 · speeder bike	8	16	32	64		128
80 · landspeeder	16	32	64	120		240
150 · airtspeeder	30	60	120	240		480
300 · walker / tank	60	120	240			
Both take it	Ram damage applies to both vehicles — a bike ramming at 40 destroys itself. Ramming is a desperation move.					
Glancing	Side-swipe = half (DX/Pilot turns a head-on into a glance).					
Into a wall	Ramming a stationary object — vehicle takes full , the wall shrugs it off (soft ground: half).					
Hitting a person	Full ram damage; they roll DX/Acrobatics at –2 (fast) / –4 (extreme) to dive aside for half.					
Force-thrown object	Driven into a wall: 1d per 2 hexes of momentum lost.					

THR THROWING & SCATTER

Skill	Throwing or DX. A grenade is SM 0; use the Size/Speed/Range penalties (Page 2).
Range	Roughly ST × 3.5 m easy (½D), ST × 5 m max. A strong arm throws farther.
Miss → scatter	A missed throw scatters : it lands (margin of failure) hexes away in a random direction (roll 1d for the facing). Work falloff from where it actually lands.
Use the timing	End-of-turn blasts let foes dive this turn; instant (thermal det) gives no warning; fixed-delay can be lobbed to land first.
Cook-off / throw-back	Hold a timed grenade to shorten the fuse (risky). A foe may spend a Ready to throw back one that hasn't gone off.

KB KNOCKBACK & HEAVY IMPACT

Knockback	Per full (ST – 2) of a blow's basic damage (before the wound multiplier), the target is shoved 1 hex . Crushing = full · cutting = half · impaling/piercing = none (they punch through). Happens even if DR stops the wound.
Falling down	Shoved 1 hex = stay up. 2+ hexes → roll best of DX / Acrobatics / Judo or fall prone (–1 per hex past the first).
Into a wall	Slammed into a hard object → +1 HP crushing per metre not travelled (the stop you didn't get to make).
Heavy Impact HOUSE	Cannon-class weapons (assault/blaster cannons, rockets) knock back like crushing even when they burn and even when DR stops the bolt . Rigid plate that stops one still passes 1 HP crushing per full 10 stopped (concussion through plate). Beskar stops the bolt — not the shove.

ATK SHIP-TO-SHIP — TO HIT		
Roll 3d6 ≤ Gunner + target SM + range mod — tracking — your evasive −2 (+ RoF bonus).		
TARGET SIZE MODIFIER (ADDED TO YOUR ROLL)		
Speeder / swoop / walker	+2	Hnd +1...+2
Starfighter / interceptor / bomber	+4	Hnd 0...+2
Gunship / shuttle	+5	Hnd −1
Freighter / transport	+6	Hnd −2
Corvette	+8	Hnd −3
Frigate	+9	Hnd −4
Cruiser / capital	+10	Hnd −5
Capital batteries (turbolasers & kin): −6 vs SM ≤ +5 targets — slow tracking. Point-defence is exempt (that's its job).		
Position advantage — win a Pilot Quick Contest for rear/flank: +2 to hit, target Dodge −2.		
Missiles & locks — warheads need a sensor lock (Electronics Op [Sensors], 1 turn). Target dodges the warhead at −2; each countermeasure system forces a lock re-roll or gives +2 Dodge.		
Point defence — each PD mount rolls Gunnery 1/turn vs an inbound missile (destroyed on success) or strafing fighter (takes a light-laser hit, 6d×2).		

DEF DEFENDING — VEHICLE DODGE		
Dodge = 3 + (Pilot ÷ 3, round down) + Hnd — roll vs each attack you can see coming.		
Evasive action	+2 Dodge, −2 your attacks	until your next turn. Declare on your turn.
Barrel roll	Pilot −1; +2 Dodge vs one	incoming attack.
Guided warhead	Dodge at −2 (countermeasures help — see ATK).	
Capital hull	Hnd −4/−5: effectively no Dodge.	Capital defence = shields, armour, point-defence.
Ace (Pilot 16) in an interceptor (Hnd +2): Dodge 10, evasive 12. The sheet shows your number live on each ship card.		

DMG COMPONENTS ARE THE HEALTH		
Per hit: ③ shields soak (SP pool) → ③ DR of the struck system – weapon AP (1:1, no dividing; exposed mounts – engines, weapons, sensors – take only 40% of hull DR) → ③ penetrating damage vs Damage Threshold (DT):		
< DT	Superficial — scorch marks, no effect.	
≥ DT	Struck system degrades one step : ● Intact → ④ Damaged → × Destroyed.	
≥ 2 × DT	Two steps — an intact system is destroyed outright.	
≥ 6 × DT	vs full hull DR – AP: VAPORISED . No parts roll, nothing to salvage. (What a turbolaser does to a fighter. Never ion.)	
DAMAGE THRESHOLD BY CLASS		
Speeders / swoops / walkers		DT 8
Starfighters / interceptors / bombers		DT 10
Shuttles / freighters / gunships		DT 15
Corvettes / frigates		DT 25
Cruisers & capitals		DT 40
How ships die: Hull × = breach, lost in 1d min (evacuate) · Reactor × = dead in space · Sublight × = adrift · or the crit table. Mission-kill ≠ destruction: board it, salvage it, or finish it.

Expected fight lengths (yardstick): fighter duel 3–4 hits · wing vs freighter 3–6 · torpedo run vs corvette −6 · squadron vs frigate −5 turns · capital duel 4–11 volleys · fighter guns vs frigate hull: never — burn the exposed mounts instead.		

SYS PER-PART EFFECTS — ④ DAMAGED / × DESTROYED	
Hull	④ integrity compromised · × BREACH — lost in 1d min
Armour	④ DR −25% · × DR 0 (facing)
Sublight	④ Move −25%, −1 Pilot evasions · × Move 0, adrift
Shields	④ cap −50%, regen halved · × SP 0, none

Exposed (40% DR): Sublight, Weapon, Sensors. Called shots use the Aim penalties on the sheet's parts table.	

FIX REPAIR LADDER & SHIELD REGEN	
Damage control (in combat)	Mechanic roll, 1/turn: jury-rig one ④ system back into action — the next hit on it re-breaks it. × can't be fixed in combat. One try per system per scene.
Astromech	As above, 1 roll/min — its own attempts, on top of the crew's.
Field patch	15–60 min per system: one × → ④, or make a jury-rig permanent.
Workshop	~6 h/system to ● (fighter); ~1 day/system (freighter); days/section (capital).
Shield regen	10% of cap per turn out of direct fire (round up). Emitters ④: half. Generator ×: none.

DRD DROIDS — TWO WAYS DOWN	
HP track (personal scale): droids have HP, no FP, no shock, no bleeding — full effect until destroyed. Component track (surgical): call the shot — droid DR (÷AD) → penetrating vs droid DT, same ④/× ladder. Core × or Power × = droid inert.	
DROID DAMAGE THRESHOLD	
Civilian chassis (protocol, medical)	DT 6
Labour (loader, mining, construction)	DT 8
Battle / war / assassin / guard	DT 10
COUNTERS — WHAT ACTUALLY WORKS	
Blasters AD 1	Fine vs civilian plating; bounce off war droids (DR 16+). Use the right tool.
Ion AD 5	The droid-killer. Ion rifle drops a war droid in ~7 hits; arcs past plating into systems.
Disruptor AD 10, ×4 wound	Illegal for a reason. Even beskar droids fall in 4-6 hits.
Beskar droids	Mando War Droid: +2 damage divisor after DR · Crusader shell: +3. Blunts everything.
Condition ladder: Shutdown (reversible — restraining bolt, ion stun, power cut) → Disabled (④ systems, repairable) → Destroyed (Core/Power × or −HP×1). Repair: Droid Mechanic + kit, ~10 min per 2d+4 HP or one system.	

ION ION & DISRUPTOR — SPECIAL RULES	
Ion vs shields	Counts double against SP pools.
Ion vs structure	Never degrades Hull or Armour; never vaporises. Arcs into systems — disables for boarding & salvage.
Ion vs droids	Always AD 5 regardless of plating; near-harmless to organics.
Ion skills HOUSE	Separate skills, DX/A: Ion Pistol · Ion Rifle · Ion Gunner. No default from Blasters — the arc handles differently.
Disruptor	AD 10, ×4 wounding. Vile, restricted, and loud about it.
The doctrine: blasters kill people · ion kills machines & shields · disruptors kill everything and your reputation. Disable, board, profit.
