

ONESHOT	① Aim (optional). Adds +Acc to next turn's shot.	② Effective skill = weapon skill + size + speed – range – cover/posture/light.	③ Roll 3d6 ≤ skill.	④ Target reacts: Dodge, dive or take cover. No Parry/Block vs bolts (except saber Deflect).	⑤ Burst hits = 1 + [margin ÷ Rcl] bolts (cap RoF).	⑥ Each bolt: –cover DR, then armour DR + AD.
----------------	--	---	--------------------------------------	---	--	--

HIT RANGED TO-HIT — SIZE · SPEED · RANGE					
Effective skill = weapon skill + Size mod + Speed bonus – Range penalty + posture / cover / light. Distance & speed in metres (1 m = 1 hex; 1 hex/turn = 1 m/s). E.g. trooper (SM 0), still, at 30 m → –7 net.					
SIZE	SM	SPEED	MOD	RANGE	MOD
20 m +	+6	≤ 2 m/s	0	≤ 2 m	0
10–15 m	+4/5	3 m/s	+1	3 m	–2
5–7 m	+2/3	5–7 m/s	+2/3	5–7 m	–3
3 m	+1	10 m/s	+4	10 m	–4
2 m	0	15 m/s	+5	15 m	–5
1.5 m	–1	20 m/s	+6	20 m	–6
1 m	–2	30 m/s	+7	30 m	–7
0.6 m	–3	50 m/s	+8	50 m	–8
0.5 m	–4	70 m/s	+9	70 m	–9
0.3 m	–5	100 m/s	+10	100 m	–10
Big = + (easier); small = –. Add to skill. Human 0 · speeder +3 · AT-ST +5 · droid –2.		Faster = + (easier to track). Add to skill. On-foot ≈ no bonus; matters for vehicles.		Farther = – (harder). Subtract from skill. 150 –11 · 200 –12 · 300 –13 · 500 –14 · 1 km –16.	

RNG RANGED — MODIFIERS, COVER & BLASTER FIRE

Aim & Acc

+Acc on the shot after Aim; extra Aim +1 each, cap +2 over Acc. Move & Attack: skill cap, –2 or –Bulk (worse).

Recoil & Bulk

–Rcl per shot after the first in a turn. –Bulk firing from M&A, snap-shot w/o Aim, or close combat.

Target Move

–1 cross-walk, –2 cross-run, –3 sprint / erratic. (Target SM & range from the To-Hit table.)

Concealment

Smoke / dim / fog –2 to –4 (to-hit only). Pitch dark: Wild Swing cap 9 / Hearing. Hurt / heavily hurt: –3 / –4 to all skills.

Suppression

HOUSE RoF 5+ into a hex / doorway / short line (no specific target). Anyone in or crossing must Dodge vs your effective skill or be hit. Consumes the full burst.

HOUSE

Ion-class skills: Ion Pistol · Ion Rifle · Ion Gunner (DX/A, no Blasters default). Ion = AD 5 vs droids/shields, near-harmless to organics. Droid & ship rules → Side B.

COVER — DR ABSORBED BEFORE DAMAGE REACHES YOU (SEPARATE FROM TO-HIT PENALTY)

Wooden door / fence

DR 3

bolts pass after 1st hit

Sandbag wall

DR 12

absorbs bolts; degrades

Brick wall

DR 8–15

cracks under fire

Concrete wall

DR 24–100

heavy weapons eventually

Permacrete / durasteel

SW

DR 50–200

structural

Hardened steel / blast door

DR 70+

heavy weapons / explosives

RATE OF FIRE — BURST HIT BONUS & RESOLUTION

ROF

BONUS

RESOLUTION

1–4

+0

On a hit, bolts connecting = [margin ÷ Rcl] + 1, capped at RoF. Defender rolls one defence; further incoming hits use the multi-def penalty (RAW –4 each). Stun bolt: dmg to FP (fat); FP ≤ 0 → HT to act; ≤ –1×FP → KO. Sealed/hardened armour may stop it.

5–8

+1

9–16

+2

17–49

+3

50–99

+4

100+

+5 /2x

EX WORKED EXAMPLE — CARBINE BURST

Blaster carbine, RoF 10, Rcl 2, skill 14. Target at 10 m (–4) and walking (–1) → effective skill 9, plus the +1 RoF-10 burst bonus = 10.
Roll 8 → hit; margin = 10 – 8 = 2. Bolts that connect = 1 + [2 ÷ 2] = 2 bolts. Roll each bolt's damage on its own; subtract the target's DR (÷ the weapon's AD) from each.

BND RANGE BANDS — WHAT EACH DISTANCE FEELS LIKE		
The to-hit penalty comes from the Range table at left. These bands tell you how a fight at that distance actually plays. 1 hex = 1 m .		
RANGE	PEN.	BAND & HOW IT PLAYS
0–2 hex	0	Point-blank. Close-combat & Bulk penalties apply; most defences available.
3–5 hex	–2/3	Brawling distance. Pistols ideal; long arms suffer Bulk up close.
7–10 hex	–3/4	Room-to-room. Burst fire devastating; cover is everything.
15–20 hex	–5/6	Hall / open room. Where most blaster fights settle. Carbines = rifles.
30–50 m	–7/8	Outdoor close. Aim essential; pistols fall off past 30 m.
70–100 m	–9/10	Medium. Rifle territory; multi-turn Aim. Many pistols hit their ½D here.
Farther: 150 m –11 · 200 m –12 · 300 m –13 · 500 m –14 · 1 km –16.		
RNG+ RANGED-ONLY RULES		
Forbidden w/ ranged	No Rapid Strike, Deceptive, Feint, Beat, Ruse or Combination. For more hits use Rate of Fire (bursts) — not melee tricks.	
Move and Attack	Full Move + fire: –2 or the weapon's Bulk , whichever is worse. (The skill-9 cap is melee-only.)	
Into a melee	–4 to single out a target in a scrum; miss badly → you may hit a random fighter in that hex (GM call).	
Gun at arm's reach	You can fire at reach C, but you can be parried, grabbed or grappled ; long arms suffer Bulk. Pistols are the close choice.	
Aim	+Acc on next turn's shot; +1 per extra Aim (cap +2). Brace & stay still: a further +1 . Lose all Aim if you move or get hit.	
Two guns	One per hand: off-hand at –4 without Ambidexterity.	
DEF DEFENDING AGAINST RANGED		
You must see it	No defence against a shot you're unaware of (rear/surprise). Aware → you may react.	
Dodge / dive	Dodge the shot, or dive for cover / drop prone (Movement Defence) to break line-of-fire.	
No Parry/Block	You can't Parry or Block a bolt — except a lit lightsaber's Deflect (and a few Force powers).	
Cover vs concealment	Cover = DR off the damage. Concealment = –to-hit only.	

½D HALF-DAMAGE & MAX RANGE · COVER VS CONCEALMENT	
½D range	Listed on each weapon card. Past ½D, halve the damage — the bolt has bled off, the slug has slowed.
Max range	Beyond it the shot cannot reach . Most blasters: ½D ≈ ⅓ of Max.
Cover	Physical DR between you and the bolt. Subtract cover DR from the damage (see DR table). Does NOT change the to-hit roll.
Concealment	Can't be seen clearly (smoke, dark, fog): –to-hit only , gives NO DR. Total whiteout → attacker uses Wild Swing (skill 9).
Partial cover	Only part of you exposed → attacker eats the hit-location penalty for that part; cover DR still applies if the bolt clips the barrier.

WPN COMMON RANGED WEAPONS — QUICK STATS							
Dmg = basic damage & type · AD = armour divisor (higher punches through more DR) · Acc = aim bonus · RoF = shots per turn · Rcl = recoil (–per extra hit in a burst) · ½ D / Max = range in metres (past ½D, halve damage; past Max, can't reach) · Shots = before reload. Full catalogue lives on the character sheet. SW							
WEAPON	DMG	AD	ACC	ROF	RCL	½D / MAX	SHOTS
Hold-out blaster	1d+2 burn	1	1	3	2	50 / 500	30
Blaster pistol	3d burn	1	3	3	2	100 / 1200	50
Heavy blaster pistol	4d burn	3	3	3	3	120 / 1500	30
Blaster carbine	4d+1 burn	1	4	10	2	200 / 1800	40
Blaster rifle	5d burn	1	5	3	2	500 / 2500	50
Assault blaster rifle	5d+2 burn	1	5	10	2	500 / 2500	50
Blaster sniper rifle	6d+2 burn	1	6+2	1	2	1000 / 4000	20
Ion pistol (droids)	2d+2 ion	5	2	3	2	50 / 600	30
Disruptor pistol	3d×2 cor ×4	10	2	1	2	30 / 300	10
Heavy slug pistol	3d–1 pi+	1	2	3	4	120 / 1800	8
Slug sniper rifle	6d+1 pi+	1	6	1	4	800 / 4500	10
Mando repeating blaster	6d+6 burn	3	4	15	7	500 / 1000	100
							Suppression; high Rcl.

GURPS 4E · KNIGHTS OF THE OLD REPUBLIC · SIDE A · PAGE 3 OF 4

GRN **GRENADES, CHARGES & MINES — AT A GLANCE**

(N) after the dice = **armour divisor**. **ex** = explosive (uses fallon; left). **[Nd] frag** = secondary shrapnel, **pi** (ignores shields). Timing: **end-of-turn** = goes off at the turn's close · **fixed** = can't be rushed · **instant** = on landing. Full list on the sheet & compendium Codex VI. **SW**

ITEM	BLAST (CENTRE)	RADIUS	TIMING
Fragmentation grenade	6d(1) cr ex + [3d] frag	3 m	end-of-turn
Concussion grenade	5d cr ex (knockback)	3 m	end-of-turn
Plasma / concussion	6d(2) burn ex	3 m	end-of-turn
Thermal detonator	6d×3(2) burn ex	4 m	Instant
Ion grenade (droids)	6d(5) ion ex	3 m	2-sec
Stun grenade	HT–4 aff (stun 1d t)	3 m	end-of-turn
Flash-bang	HT–4 aff (blind+deaf 1d t)	4 m	end-of-turn
Smoke grenade	concealment cloud	4 m	end-of-turn
Cryoban grenade	4d(1) cr + slow	3 m	2-sec
Incendiary grenade	4d burn ex + fire field	3 m	2-sec
Gas grenade (acid)	3d cor/turn cloud	4 m	2-3-sec
Sonic grenade	5d(0.5) son ex + HT–3 stun	4 m	2-sec
Seismic charge	6d×3(2) cr ex (huge)	6 m	3-sec arm
Plasma/thermal charge	6d×4(3) burn ex	5 m	3-sec arm

SW HOW FORCE POWERS ARE DEFENDED

Every power card lists its **Defence**. The buckets:

Dodge / Parry / Block	Physical Force attacks — telekinetic throws, hurled objects, Force-thrown sabers, and Force Lightning (lit saber → Lightning Lock). Normal active defences apply.
Resist — contest	Mind & body intrusions, never dodged: QC vs Will (fear, domination, illusion, mental horror), HT (bodily pain/agony, stun, drain), or ST (telekinetic grapple). Mind Block / Mind Shield always apply vs any mind-affecting power.
Force-on-Force	Powers attacking the Force connection (Drain Force, Sever, etc.): resist with Will or <i>your Force skill if higher</i> — that option is Force-on-Force only.
No defence	Self/ally buffs, senses, and powers stating "none" simply take effect.

HOUSE SABER LOCK & LIGHTNING LOCK

Forms two ways: (1) On purpose — declare as your Attack if you parried them (or they parried you) last turn; the foe may break away by retreating a hex unless walled / pinned. **(2) By accident** — when two sabers clash (or a saber & a saber-resistant blade: beskar / cortosis / phrik / songsteel), **roll 1d; on a 6 the blades catch**. Ordinary blades are sheared — they never lock.

EACH TURN, PICK ONE	EFFECT
Force / sword contest	QC of your Force attribute (ST Torrent · DX Velocity · Will Vessel · HT Tempered) — non-Force: higher of ST/DX. +1 per 2 ST over foe ; +1 two-handed; +1/pt SM; –2 bad footing. Not Lightsaber skill — the saber's up-to +20 would auto-win.
Break away	Spend your turn, step out, and the lock. If the foe did not also break, they get the <i>Bend-the-guard</i> result on you as you turn aside.
Bear down	All-Out push: +2 to the contest this turn, but no active defence until your next turn.
Win by 1-2 bend guard (foe –2 defences vs you / shove 1 m) · 3-5 break guard (free attack +2 / shove + knockdown / disarm +2) · 6+ overpower (knockback + prone, or free attack +4) · tie blades stay locked, both –2 vs everyone else. Crit fail: fall prone, foe gets the 6+ result.	

SW Lightning Lock: a lit saber **always** parries Force Lightning; a successful parry forms a lock instead of scattering it. Sustained QC each turn — attacker rolls Force Lightning skill, defender rolls **their Force attribute** (+1 Tempered Blade, or Tutaminis if trained). Both pay FP (defender 1 FP per 4 dmg held). Defender wins by 6+ → **redirect the storm at the caster** (−2 their defence); loses by 3+ → full damage. Either may break off (defender Dodge clear).

STS STATUS EFFECTS – QUICK REFERENCE

Stunned	No actions; defences -4 . Recover: HT roll (physical) or IQ (mental) at end of each turn. Combat Reflexes +6 vs mental freeze.
Knock	-1 per HP lost (cap -4) to DX/IQ skills on your <i>next turn only</i> . Not defences. High Pain Threshold negates.
Shocked down	Major wound / Face / Skull hit: HT roll or fall prone & drop what's held (fail by 5+; also stunned). Standing = a Change Posture maneuver.
Bleeding	Vitals/Neck wounds: HT each turn or lose 1 HP until tended (First Aid) — lightsaber & blaster burns cauterise (no bleed).
On Fire SW	1d-3 burn per turn (min 1) until out: drop & roll (DX) or smother (Ready action). Sealed armour protects until its DR is breached; fire fields burn 1d/turn.
Poisoned	HT roll to resist (at the toxin's listed number); fail = listed damage, often delayed or staged. Antitox injector: +3 HT & neutralises one known toxin. Sealed armour stops contact gas; cloth doesn't.
Electrified / Stun bolt	Stun settings & sonic: aff HT-N — fail = stunned (recover as above); damage goes to FP not HP . Electrified surfaces/shock-whips: HT or stunned + 1 FP per contact turn.
Suffocating	HT every 15 sec ; each fail = 1 FP. At 0 FP: 1 HP/turn until air. Vacuum adds 1d-1 burn per 5 sec (unsealed).
Droids	No shock, no bleeding, no FP — full effect until destroyed. Droid "stun" = ion stagger : lose 1 turn, defences -4, HT each turn to reboot.

Sheet automation: conditions toggle on the Combat tab and feed their penalties into the Skill Roller automatically.

THR THROWING & SCATTER

Skill	Throwing or DX. A grenade is SM 0; use the Size/Speed/Range penalties (Page 2).
Range	Roughly ST × 3.5 m easy (½D), ST × 5 m max. A strong arm throws farther.
Miss → scatter	A missed throw scatters : it lands (margin of failure) hexes away in a random direction (roll 1d for the facing). Work falloff from where it actually lands.
Use the timing	End-of-turn blasts let foes dive this turn; instant (thermal det) gives no warning; fixed-delay can be lobbed to land first.
Cook-off / throw-back	Hold a timed grenade to shorten the fuse (risky). A foe may spend a Ready to throw back one that hasn't gone off.

AOE EXPLOSIONS & AREA OF EFFECT

The falloff rule. An explosion deals its **full listed damage at the centre hex**, then weakens as it spreads: **damage = centre ÷ (3 × hexes away)**. So 1 hex out is ÷3, 2 hexes ÷6, 3 hexes ÷9. The table below is pre-divided — just read across to the victim's hex.

Then armour. Apply the weapon's armour divisor & the victim's DR **after** falloff. Concussion is **cr** (plate resists); frag & shrapnel are **pi** (ignore shields); plasma/thermal is **burn** (energy). **SW**

PRE-COMPUTED FALLOFF — AVERAGE DAMAGE AT EACH HEX								
CENTRE	HEX 0	1 (+3)	2 (+6)	3 (+9)	4	5-6	TYPICAL WEAPONS	
3d (10)	10	~3	~2	~1	—	—	Cryoban, incendiary, sonic grenade	
6d (21)	21	~7	~3	~2	~1	—	Frag, plasma / concussion, ion grenade	
6d×2 (42)	42	~14	~7	~5	~3	~2	Proximity mine, wrist rocket	
6d×3 (63)	63	~21	~10	~7	~5	~4	Thermal detonator, limpet, rocket launcher	
6d×4 (84)	84	~28	~14	~9	~7	~5	Plasma / thermal charge, missile tube	
Dive for cover	See it coming → Dodge or Acrobatics to dive. Each hex you move out steps you down one column. Diving prone in-hex doesn't cut damage but can put cover between you & the blast.							
Concussion stun	Even a non-wounding blast: HT vs the centre damage or be stunned (lose next turn). Brain-damage cap ~8 if very close.							
Fixed-radius clouds	Gas/smoke/flash-bang fill a set radius at uniform effect (no falloff): flash-bang ~2 hex · gas ~3 · smoke ~4. HT resists; sealed armour negates gas.							
Contained blast	Sealed room/corridor — the blast can't vent: shift one hex gentler (everyone takes ≥ the hex-2 value). Why a thermal det "guts a room".							

VEL VELOCITY & "SMASH" DAMAGE — FALLS, SLAMS & COLLISIONS

Speed and mass hurt. These are all **crushing** and all cause **knockback**. 1 hex = 1 m, 1 turn = 1 s, so hexes-per-turn = m/s.

FALLING — 1D-3 CRUSHING PER METRE FALLEN

	2 M	5 M	10 M	20 M	50 M	100 M+
Damage (cr)	2d-6	5d-15	10d-30	20d-60	~25	~50
Typical	~1	~3	~5	~10	~25	60+ cap
Soften it: best of DX , Acrobatics or Judo — success halves , critical quarters . Into water: half (low falls); clean entry (Acrobatics/Swim) halves again. Terminal velocity ~200 m/s → 200 m+ ≈ max.						

SLAM, SHOVE & CHARGE (ON FOOT)

Slam / charge	Move and Attack into a foe (to-hit skill capped at 9 , or DX+2). Damage = your thrust crushing . Both of you can be knocked down.
Slam stone SW	+3 to hit & knockback, counts ST +4 for slam damage, and may stun a smaller foe . A rocket-pack burn-charge adds +2 .
Shove	Quick Contest of ST — win = push the foe back 1 hex (more on a big margin). Force Push does this at range.

VEHICLE RAM & COLLISION — $(HP \div 5) \times (\text{RELATIVE SPEED IN HEX/TURN} \div 10)$

VEHICLE HP \ SPEED	10	20	40	80
40 · speeder bike	8	16	32	64
80 · landspeeder	16	32	64	128
150 · airtspeeder	30	60	120	240
300 · walker / tank	60	120	240	480

Both take it Ram damage applies to **both** vehicles — a bike ramming at 40 destroys itself. Ramming is a desperation move.

Glancing Side-swipe = **half** (DX/Pilot turns a head-on into a glance).

Into a wall Ramming a stationary object — vehicle takes **full**, the wall shrugs it off (soft ground: half).

Hitting a person	Full ram damage; they roll DX/Acrobatics at -2 (fast) / -4 (extreme) to dive aside for half.
------------------	---

Force-thrown object Driven into a wall: **1d per 2 hexes** of momentum lost.

ATK SHIP-TO-SHIP — TO HIT		
Roll 3d6 ≤ Gunner + target SM + range mod — tracking — your evasive −2 (+ RoF bonus).		
TARGET SIZE MODIFIER (ADDED TO YOUR ROLL)		
Speeder / swoop / walker	+2	Hnd +1...+2
Starfighter / interceptor / bomber	+4	Hnd 0...+2
Gunship / shuttle	+5	Hnd −1
Freighter / transport	+6	Hnd −2
Corvette	+8	Hnd −3
Frigate	+9	Hnd −4
Cruiser / capital	+10	Hnd −5
Capital batteries (turbolasers & kin): −6 vs SM ≤ +5 targets — slow tracking. Point-defence is exempt (that's its job).		
Position advantage — win a Pilot Quick Contest for rear/flank: +2 to hit, target Dodge −2.		
Missiles & locks — warheads need a sensor lock (Electronics Op [Sensors], 1 turn). Target dodges the warhead at −2; each countermeasure system forces a lock re-roll or gives +2 Dodge.		
Point defence — each PD mount rolls Gunnery 1/turn vs an inbound missile (destroyed on success) or strafing fighter (takes a light-laser hit, 6d×2).		

DEF DEFENDING — VEHICLE DODGE		
Dodge = 3 + (Pilot ÷ 3, round down) + Hnd — roll vs each attack you can see coming.		
Evasive action	+2 Dodge, −2 your attacks until your next turn. Declare on your turn.	
Barrel roll	Pilot −1; +2 Dodge vs one incoming attack.	
Guided warhead	Dodge at −2 (countermeasures help — see ATK).	
Capital hull	Hnd −4/−5: effectively no Dodge. Capital defence = shields, armour, point-defence.	
Ace (Pilot 16) in an interceptor (Hnd +2): Dodge 10, evasive 12. The sheet shows your number live on each ship card.		

DMG COMPONENTS ARE THE HEALTH		
Per hit: ① shields soak (SP pool) → ② DR of the struck system — weapon AP (1:1, no dividing; exposed mounts — engines, weapons, sensors — take only 40% of hull DR) → ③ penetrating damage vs Damage Threshold (DT):		
< DT	Superficial — scorch marks, no effect.	
≥ DT	Struck system degrades one step: ● Intact → ④ Damaged → × Destroyed.	
≥ 2 × DT	Two steps — an intact system is destroyed outright.	
≥ 6 × DT	vs full hull DR — AP: VAPORISED. No parts roll, nothing to salvage. (What a turbolaser does to a fighter. Never ion.)	
DAMAGE THRESHOLD BY CLASS		
Speeders / swoops / walkers		DT 8
Starfighters / interceptors / bombers		DT 10
Shuttles / freighters / gunships		DT 15
Corvettes / frigates		DT 25
Cruisers & capitals		DT 40
How ships die: Hull × = breach, lost in 1d min (evacuate) · Reactor × = dead in space · Sublight × = adrift · or the crit table. Mission-kill ≠ destruction: board it, salvage it, or finish it.		

WPN SHIP WEAPONS — DAMAGE · AP		
Light laser cannon	6d×2	dogfight, high RoF
Laser cannon	6d×3	the fighter standard
Heavy laser cannon	6d×4 · AP 5	bullies freighters
Quad laser (turret)	6d×3 · RoF 4	the freighter's teeth
Ion cannon	6d×2 ion	anti-shield / anti-system
Ion railgun	6d×3 ion · AP 5	shield-stripper
Concussion missile	6d×4 · AP 10	guided; needs lock
Proton torpedo	6d×6 · AP 20	the trench-run shot
Thermite torpedo	6d×4 · AP 80	armour-melter
Slug railgun	6d×6 · AP 20	sniper hull-killer
Point-defence laser	6d×2	anti-fighter / anti-missile
Turbolaser (light → heavy)	6d×10−×20	capital batteries
Neuralyzer array SW	— · 3-turn lock	bypasses shields; crew HT−4 or out. Droids immune
Expected fight lengths (yardstick): fighter duel 3-4 hits · wing vs freighter 3-6 · torpedo run vs corvette −6 · squadron vs frigate −5 turns · capital duel 4-11 volleys · fighter guns vs frigate hull: never — burn the exposed mounts instead.		

SYS PER-PART EFFECTS — ④ DAMAGED / × DESTROYED	
Hull	④ integrity compromised · × BREACH — lost in 1d min
Armour	④ DR −25% · × DR 0 (facing)
Sublight	④ Move −25%, −1 Pilot evasions · × Move 0, adrift
Shields	④ cap −50%, regen halved · × SP 0, none
Reactor	④ weapons every 2nd turn, Move −25% · × dead in space
Weapon	④ −1 hit, RoF −25% · × mount gone
Sensors	④ −2 detect · × eyeball only, −6, no auto-targeting
Targeting	④ −1 attacks · × −4 attacks, no missile lock
Hyperdrive	④ Astrogation −4, double jump time · × no jump
Astrogation	④ Astrogation −2 · × −8, manual plotting
Life Support	④ 1 hr air · × 5 min — suit up
ECM	④ lose defence bonus · × no jamming, no decoys
Crew / Cargo	④ section compromised · × vented / contents lost
Exposed (40% DR): Sublight, Weapon, Sensors. Called shots use the Aim penalties on the sheet's parts table.	

FIX REPAIR LADDER & SHIELD REGEN	
Damage control (in combat)	Mechanic roll, 1/turn: jury-rig one ④ system back into action — the next hit on it re-breaks it. × can't be fixed in combat. One try per system per scene.
Astromech	As above, 1 roll/min — its own attempts, on top of the crew's.
Field patch	15-60 min per system: one × → ④, or make a jury-rig permanent.
Workshop	~6 h/system to ● (fighter); ~1 day/system (freighter); days/section (capital).
Shield regen	10% of cap per turn out of direct fire (round up). Emitters ④: half. Generator ×: none.

DRD DROIDS — TWO WAYS DOWN	
HP track (personal scale): droids have HP, no FP, no shock, no bleeding — full effect until destroyed. Component track (surgical): call the shot — droid DR (+AD) → penetrating vs droid DT, same ④/x ladder. Core × or Power × = droid inert.	
DROID DAMAGE THRESHOLD	
Civilian chassis (protocol, medical)	DT 6
Labour (loader, mining, construction)	DT 8
Battle / war / assassin / guard	DT 10
COUNTERS — WHAT ACTUALLY WORKS	
Blasters AD 1	Fine vs civilian plating; bounce off war droids (DR 16+). Use the right tool.
Ion AD 5	The droid-killer. Ion rifle drops a war droid in ~7 hits; arcs past plating into systems.
Disruptor AD 10, x4 wound	Illegal for a reason. Even beskar droids fall in 4-6 hits.
Beskar droids	Mando War Droid: +2 damage divisor after DR · Crusader shell: +3. Blunts everything.
Condition ladder: Shutdown (reversible — restraining bolt, ion stun, power cut) → Disabled (④ systems, repairable) → Destroyed (Core/Power × or −HP×1). Repair: Droid Mechanic + kit, ~10 min per 2d+4 HP or one system.	

ION ION & DISRUPTOR — SPECIAL RULES	
Ion vs shields	Counts double against SP pools.
Ion vs structure	Never degrades Hull or Armour; never vaporises. Arcs into systems — disables for boarding & salvage.
Ion vs droids	Always AD 5 regardless of plating; near-harmless to organics.
Ion skills HOUSE	Separate skills, DX/A: Ion Pistol · Ion Rifle · Ion Gunner. No default from Blasters — the arc handles differently.
Disruptor	AD 10, x4 wounding. Vile, restricted, and loud about it.
The doctrine: blasters kill people · ion kills machines & shields · disruptors kill everything and your reputation. Disable, board, profit.
