

COMBAT OPERATIONS CHEATSHEET

GURPS 4E · KNIGHTS OF THE OLD REPUBLIC CAMPAIGN

QUICK-REFERENCE BATTLE SCREEN · A3 · READS LEFT → RIGHT BY PHASE OF PLAY

RECONCILED TO **THE FORCE & THE FIGHT — COMPLETE COMPENDIUM**

REV 2 ION-CLASS SKILLS · METRIC (1 M = 1 HEX) · DAMAGE CHAIN & ARMOUR DIVISOR · **SIDE B: SHIP & DROID COMPONENT COMBAT**

① · ② · ③ · ④ · ⑤ · ⑥ THE TURN — COMBAT MANEUVERS				
Turn order: highest Basic Speed (HT+DX)+4 first; tie → higher DX, then 1d6. Surprised side acts after & may only Do Nothing with no active defences (DR still applies); Combat Reflexes negates the freeze. Pick ONE maneuver (Blocks ③–⑤), then layer modifiers (④ attacks; ⑤–⑥ defences). Use: M melee · R ranged · M+R both · MA Martial-Arts technique.				
MANEUVER / MODIFIER	USE	NOTES	MOVE	DEFENCE
④ ALL-OUT ATTACK — sacrifice ALL active defences for a better attack. Step or full Move. HOUSE offensive QA / SR & Fast-Draw stay legal; defensive ones do not.				
AoA (Determined)	M+R	+4 to hit. Single attack.		None
AoA (Strong)	M	+2 dmg or +1/die if better. Thr/slow — not force swords.	Half	None
AoA (Double)	M+R	Two attacks, same/different targets. May swap one slot for Rapid Strike, DWA, or Feint.	Half	None
AoA (Feint)	M	Free Feint, then a normal Attack with the margin applying. Same target.	Half	None
AoA (Long) MA	M	Reach +1 for the attack, no hit penalty. Swing −2 dmg / −1 per die.	Half	None
⑤ ALL-OUT DEFENCE — sacrifice your attack to focus on defence. Step permitted.				
AoD (Increased)	M+R	+2 to ONE chosen Active Defence.	Step	+2 one
AoD (Increased) — Balanced MA	M+R	Alternative: +1 to TWO different defence types instead of +2 to one.	Step	+1 two
AoD (Double)	M+R	Two Active Defences vs the SAME attack. Different types, or two parries w/ different weapons. Not two Dodes. 2nd takes multi-def penalty.	Step	2 def/atk
⑥ STANDARD MANEUVERS — normal one-attack or non-attack maneuvers. Defences normal.				
Attack	M+R	One attack with any ready weapon. May add Block & modifiers.	Step	Any
Defensive Attack MA	M	One attack at −2 dmg (or −1/die, worse). Pick ONE: +1 to one defence; OR +2 vs Leg Grapples & +2 DX vs falling on kicks; OR parry with same balanced weapon used to attack.	Step	+1 one
Committed Attack (Det.) MA	M	One melee attack +2 hit . Step or 2 steps (2nd → −2 hit). Attacking limb can't defend; other defences −2. No retreat.	Step ×2	−2 / 0
Committed Attack (Strong) MA	M	One melee attack at normal skill, +1 dmg . Thr/slow — not force swords. Movement & defence as Det.	Step ×2	−2 / 0
Move and Attack	M+R	Full Move + one attack. Melee skill cap 9 (or DX+2). Ranged −2 or Bulk (worse). No retreat. No Rapid Strike.	Full	Dodge/Block
Aim	R	+Acc 1st turn, +1 each 2nd & 3rd (cap +2 over Acc). Spoiled if you defend (Will roll to retain).	Step	Any*
Evaluate	M	+1 (1it) +2 (2t) / +3 (3t+) on next attack. Cancels foe Deceptive on YOUR defence until you attack.	Step	Any
Feint	M	QC best Melee/Unarmed/Cloak (or DX) vs their best weapon skill or DX. Your winning margin = the penalty to ONE of their active defences vs your next attack (next turn). Defensive Feint: that penalty instead applies to their next attack on you.	Step	Any
Move	M+R	Run at full Move. +1 sprint bonus on consecutive running turns.	Full	Any
Change Posture	M+R	Stand / sit / kneel / crawl / prone / face-up.	None	Any
Ready	M+R	Draw, reload, change grip/reach, clear a jam, prepare an item.	Step	Any
Concentrate SW	M+R	Sustained mental effort — required for Force powers tagged Concentrate. If hit, Will roll or lose concentration AND any FP spent.	Step	Any*
Wait	M+R	Wait for a trigger; fires before the triggering action. Move & Defence per the specified action.	None*	*
Do Nothing	M+R	Start of combat or when stunned. Defence −4 if stunned. HT/IQ to recover.	None	Any*
④ ATTACK MODIFIERS — layer WITHIN an Attack / Committed / AoA / Defensive / M&A maneuver. Melee-only; Deceptive, Rapid Strike, Beat, Ruse, Combination.				
Deceptive Attack	M	−2 hit → −1 to foe's defence (no cap beyond skill). Stacks w/ Targeted, Committed, AoA. Contradicts Telegraphic: Evaluate cancels it on YOUR defence (net 0).	*	*
Dual-Weapon Attack	M+R	Two attacks, one per hand, each −4 (−8 off-hand without Ambidexterity / Off-Hand Training). Cannot combine w/ Rapid Strike same turn.	*	*
Rapid Strike	M	Two attacks, single weapon (or unarmed), each −6 (−3 w/ TbaM or WM). Melee only — for ranged use RoF.	*	*
Targeted Attack	M+R	Aim for a specific hit location (penalty per chart). Wound effects apply there. Repeating same target → +1 to their defence on 3rd+ try.	*	*
Telegraphic Attack	M+R	+4 hit ; target gets +2 defence . Stacks w/ Rapid Strike, Targeted, Committed. Contradicts Deceptive.	*	*
Wild Swing	M+R	Skill capped at 9 ; attack a target you cannot clearly see (rear, dark, obscured).	*	*
Beat MA	M	Within Feint. QC your ST-based weapon skill vs their ST/DX weapon skill. Win → ONE named defence penalised by your margin , vs ALL attackers, until end of your next turn. Requires you parried them (or vice-versa) last turn, or they're grappled.	*	*
Ruse MA	M	Within Feint. QC your IQ-based weapon skill vs their Per-skill / DX-skill / Tactics. Win → ONE defence penalised by your margin , vs your next attack only.	*	*
Combination MA	M	Trained multi-strike sequence. Buys off Rapid Strike penalty per level. One per maneuver max. Not w/ M&A.	*	*
⑤ DEFENCE OPTIONS — avoid, mitigate, or eat the attack. Once per turn unless noted.				
Retreat (Any)	M+R	Step 1 m back. +3 Dodge or fencing/Box/Judo/Karate Parry; +1 other Parry/Block. Costs your step. Not vs a grapple.	*	*
Acrobatic Dodge	M+R	Roll Acrobatics → +2 Dodge on success, −2 on failure. Crit fail: fall. Once/turn.	*	*
Feverish Defence MA	M+R	Spend 1 FP → +2 to one defence. Once/turn. Not during Committed/AoA. Crit fail: 1 HP injury.	*	*
Sacrificial Dodge	M+R	Dodge −2; take a hit for an adjacent ally. Cannot use after AoA/Committed/M&A. Ends prone.	*	*
Movement Defences MA	M	Dive&Drop −1 + retreat, end prone. Sideslip: step sideways same dist, −1 + retreat (standing). Slip: step CLOSER, −2 + retreat; counters Stop Thrust at −1.	*	*
Defensive Grip MA	M	Hold weapon close: +1 Parry vs frontal; −2 to your attacks; reach −1. Switch grip = a Ready.	*	*
⑥ COUNTER-ATTACK & PUNISHING DEFENCES — defences that strike back or set up your next attack with a penalty on the foe.				
Riposte MA	M	On a parry, accept −1 to −4 off your Parry (floor B before Enh Parry & CR). success → your first attack next turn on that foe forces them to defend at the SAME penalty you took (take −3 → they're at −3). Full penalty hits the matching defence (parried weapon=Parry, shield=Block, unarmed=+Dodge); half (round down) on their other defences. Riposte is a Deceptive Attack — don't stack Deceptive.	*	*
Counterattack MA	M+R	Hard tech, default skill −5. After a successful Dodge/Parry/Block → your next attack on that foe (this turn or next) penalises their defence by a flat −2 (no defensive risk like Riposte, but smaller & fixed). Can't combine with Riposte same turn.	*	*
Stop Hit MA	M	Wait variant. Both attack on trigger; lower-margin attacker defends at −1 (−3 if parrying with the attacking weapon). Stops melee charges.	*	*
Stop Thrust	M	Wait variant vs a charging foe. +1 dmg per 2 m of their Move, max +3. Knockdown interrupts their attack.	*	*
Aggressive Parry MA	M	Parry −2 → thrust dmg to attacker's attacking limb (uses their HP for criolino). Crit fail: self-injury.	*	*

Source of truth: **The Force & the Fight — Complete Compendium** (KOTOR campaign). Where this sheet and the compendium differ, the compendium governs.

HIT RANGED TO-HIT — SIZE · SPEED · RANGE					
Effective skill = weapon skill + Size mod + Speed bonus − Range penalty + posture / cover / light. Distance & speed in metres (1 m = 1 hex; 1 hex/turn = 1 m/s). E.g. trooper (SM 0), still, at 30 m → −7 net.					
SIZE	SM	SPEED	MOD	RANGE	MOD
20 m +	+6	≤ 2 m/s	0	≤ 2 m	0
10-15 m	+4/5	3 m/s	+1	3 m	−2
5-7 m	+2/3	5-7 m/s	+2/3	5-7 m	−3
3 m	+1	10 m/s	+4	10 m	−4
2 m	0	15 m/s	+5	15 m	−5
1.5 m	−1	20 m/s	+6	20 m	−6
1 m	−2	30 m/s	+7	30 m	−7
0.6 m	−3	50 m/s	+8	50 m	−8
0.5 m	−4	70 m/s	+9	70 m	−9
0.3 m	−5	100 m/s	+10	100 m	−10
Big = + (easier); small = −. Add to skill. Human 0 · speeder +3 · AT-ST +5 · droid −2. Faster = + (easier to track). Add to skill. On-foot = no bonus; matters for vehicles. Farther = − (harder). Subtract from skill. 150 −11 · 200 −12 · 300 −13 · 500 −14 · 1 km −16.					

CRIT CRITICAL SUCCESS & FAILURE	
Crit success: nat 3-4 always; nat 5 if skill ≥ 15; nat 6 if skill ≥ 16. Crit failure: nat 18 always; nat 17 if skill ≤ 15; margin of failure ≥ 10. Defence crit: auto-defend + attacker is off-balance −2 DX, defences & skills until they Ready . Crit Parry = free Aggressive Parry to attacking limb; Crit Dodge +1 m free step; Crit Block drives attacker back. Crit fail (def): auto-fail + attacker may roll Crit Hit. Skill/HT/Will/IQ crit: success = ideal/quick resist; fail = worst/lingering (2x FP on Force SW).	
HOUSE Crit Hit → Counter-Crit Defence. On a critical hit the defender MAY still attempt an active defence, but it succeeds ONLY on a critical defence of its own (nat 3-4; 5 at def ≥ 15; 6 at def ≥ 16) — else the hit lands. DR still applies ; damage rolled normally then modified per the row. Extra defences take the multi-def penalty & each needs its own crit. Lightsaber Parry SW vs a critical bolt follows the same rule.	

3D	CRITICAL HIT	CRITICAL MISS
3-4	3: Max dmg + auto major wound (HT −5 vs stun). 4: Triple damage.	3: Stab self, full dmg. 4: Drop weapon + trip prone (DX−4).
5	Double damage.	Hit yourself for half damage.
6	Damage ignores DR.	Drop your weapon (Ready to recover).
7	Defender stunned (HT to recover, def −4 while stunned).	Whiff — lose your attack.
8-10	Normal damage, no extra effect.	Lose your attack; turn over.
11	Defender drops weapon.	You drop your weapon.
12	Knockdown — defender prone.	Fall prone (DX or Acro to avoid).
13-14	Defender stunned (HT each turn).	Hit random ally in melee range.
15-16	Major wound regardless of dmg. HT or stun + knockdown.	Weapon damaged — HT or breaks next use.
17-18	17: HT at −5 or die. 18: Outright kill.	17: Weapon broken. 18: Broken + fall + self-injury.

HOUSE TURN ECONOMY — QUICK ACTION & SPECIAL REACTION	
Quick Action (1/turn): alongside your maneuver. Force Push/Pull (full FP), Fast-Draw, single-touch device activation. Defensive QA forbidden during AoA; offensive QA + Fast-Draw still permitted. Special Reaction (1/turn, Force-only, full FP): Force Push/Pull as a triggered Reaction on top of an active defence — does not consume the defence slot. Defensive use (redirect threat) forbidden during AoA; offensive use (shove/pull foe) legal during AoA.	

GRP GRAPPLING		
Close-combat range only. Grappled = −4 DX, can't move freely. While grappled: no retreat; no parry w/ grappled arm; no Sacrificial Dodge.		
ACTION	ROLL	EFFECT
Grapple	DX/grappling skill vs target's active defence	Target −4 DX, can't move freely. Two hands on one body part: +3.
Takedown (req Grapple)	QC your ST or DX (best) vs theirs	Win = foe prone, grapple persists. Tie/loss = foe stands.
Pin (req Takedown)	QC ST vs ST. +3 two hands, +3 size, −4 grappled	Win = foe helpless; attackers hit automatically.
Choke (neck)	Neck grapple + QC ST (+3 2H) vs HT	Cr dmg (margin = HP), bypasses torso DR. Carotid: 2nd rd → HT or KO. Trachea: 10 s → HT or KO.
Strike / Break Free	Strike −4; Break Free QC ST vs theirs	Strike: dmg only, grapple persists. Break Free: win = escape + free step; costs full turn.

POS POSTURE		
POSTURE	ATK/DEF	TO HIT YOU · MOVE
Standing	0 / 0	Normal · Full Move
Crouching	−2/0	−2 ranged to hit you (from outside C) · Move x½
Kneeling	−2/−2	−2 to hit you · Move x½
Sitting	−2/−2	−2 to hit you · Move 0 (M&A 1 hex)
Crawling	−4/−3	+2 close / −2 ranged to hit you · Move 1 hex
Prone / Supine	−4/−3	+3 close / −2 ranged to hit you · no Move

HIT-LOCATION DIAGRAM		DO-NOT-MODIFY REFERENCE PLATE
EYES (-9) Miss by 1 hits skull or face Dam > 1/10 HP blinds As skull w/o DR		
HEAD (-5) Roll 1d 1 Eyes 2-4 Skull 5-6 Face		
BODY Roll 1d 1 Neck 2-5 Torso 6 Groin		
VITALS (-3) Heart, Lungs, Kidneys, etc Tightbeam burn x2, Imp & pi x3		
MAJOR WOUND Any single injury > 1/2 HP Cripples limb also counts as a Major Wound When you receive a MW you must make a HT check to avoid knockdown and stun		
LESS THAN 1/3 HP Halve DX and Move.		
0 HP OR LESS: Make a HT check next turn to remain conscious (-1 to HT check per full HP), and on beginning of each turn you choose to take any action including an active defense.		
-1 x HP Make a HT check or die.		
-5 x HP Character dies immediately.		
3-4 SKULL (-7) Miss by 1 hits torso, DR+2; dam x4 knockdown at -10		
5 FACE (-5) Miss by 1 hits torso Roll vs knockdown at -5		
17-18 NECK (-5) Miss by 1 hits torso Crush x1.5 cutting x2		
8 RIGHT ARM (-2) Pi+*, pi+, & imp are x1 Dam > 1/2 HP cripples		
9-10 TORSO (-0) Roll 1d 1-2 = Vitals, imp, pi, and tight beam burn only		
12 LEFT ARM (-2) Pi+*, pi+, & imp are x1 Dam > 1/2 HP cripples		
11 GROIN (-3) Males get shock x2 from crush Roll vs knockdown at -5		
15 HAND (-4) Roll randomly right/left Pi+*, pi+, & imp are x1 Dam > 1/3 HP cripples		
6-7 RIGHT LEG (-2) Pi+*, pi+, & imp are x1 Dam > 1/2 HP cripples		
13-14 LEFT LEG (-2) Pi+*, pi+, & imp are x1 Dam > 1/3 HP cripples		
16 FOOT (-4) Roll randomly right/left Pi+*, pi+, & imp are x1 Dam > 1/3 HP cripples		

LOC HIT LOCATION & CRIPPLING (HUMANOID)				
Random hit (3d): match first column. Targeted: aim anywhere, pay the to-hit penalty. Dmg types = what can reach that location (others hit Face/Torso). Cripple = single-hit injury threshold; cutting across it = severance. Major wound (> HP/2) → HT vs stun + knockdown. The weapon — not the motion — sets the damage type.				
3D	LOCATION	HIT	DMG TYPES	CRIPPLE / EFFECT
3-4	Skull / Brain	−7	All	Skull DR 2. Penetrating x4 wound. Major → HT −10 or unconscious + knockdown. Miss by 1 → Torso.
5	Face	−5	All	Crits read one row better. Cr → knockdown HT −5. Cr → HT or blinded. Miss by 1 → Torso.
—	Eye (target)	−9	imp/pi/tib-burn	Cripple HP/10 = blinded that side. x4, no DR. Both = blind. Force Sense remains SW .
6-7 13-14	Leg	−2	All; imp/pi+/pi++ x1	Cripple HP/2. Move 1, fall prone (DX to avoid), no kick. Dmg capped at limb HP. Cr cripple = severance.
8 · 12	Arm	−2	All; imp/pi+/pi++ x1	Cripple HP/2. Drop everything held; no attack/parry/grapple w/ limb. Cut cripple = severance.
9-10	Torso	0	All — standard	Standard injury. Within Torso: Vitals −3, Heart −5 (below).
11	Groin	−3	All	Cut/pi/imp = auto major wound. Males: cr x2 shock (cap −8). Stun, −5 DX for 2d turns. Knockdown HT −5.
—	Spine (target)	−8	cr/cut/imp/pi/tib-burn	Cripples both legs (lower) OR both arms (upper). Severance = paralysis below the cut.
15	Hand	−4	All; imp/pi+/pi++ x1	Cripple HP/3. Drop everything; cannot grasp or wield. 2H needs both hands.
—	Neck Vein/Artery (t)	−8	cut/imp/pi/tib-burn	x1.5 dmg. HT each turn vs bleeding (1 HP/turn) until first aid. Severance = death in seconds.
16	Foot	−4	All; imp/pi+/pi++ x1	Cripple HP/3. Move halved; −2 DX footwork (no Acro Dodge, no Retreat bonus).
—	Arm/Leg Joint (t)	−7	cr/cut/imp/pi/tib-burn	Cripple HP/4 (half normal limb). Joint often locks. Effects per parent limb.
17-18	Neck	−5	All; cr x1.5, cut x2	Severance ends combat. Major → HT or stun. Miss by 1 → Torso.
—	Vitals (target)	−3	imp/pi/tib-burn	x3 wound mult. Penetrating = major wound → HT or stun. Can't be crippled but can kill.
—	Heart (target)	−5	imp/pi/tib-burn	As Vitals (x3) + auto major wound on any penetration. Death very likely.

DEF ACTIVE DEFENCES & MULTI-DEFENCE	
Dodge	Basic Speed + 3, drop fractions; −encumbrance; +1 Combat Reflexes; +Enhanced Dodge; +DB (shield).
Parry	Skill + 2 + 3, drop fractions; weapon mod; +CR; +Enh Parry; retreat bonus. Off-hand −4 without Ambidexterity.
Block	Block skill + 2 + 3, drop fractions; +CR; +Enh Block; +DB. Needs ready shield, buckler, or cloak.
Parry vs Ranged	HOUSE Lightsaber Parry can parry ranged attacks (blaster bolts, slug rounds) as a normal Parry — same skill, no special modes. Other weapons cannot parry ranged.
Multi-def RAW	−4 cumulative per defence after the first (−4, −8, −12...). Hard ceiling.
Multi-def TbaM/WM	−2 cumulative per defence after first — ONLY for the trained weapon/skill. Others use RAW −4.
Side facing	−2 to all active defences.

RES DAMAGE RESOLUTION — STEP BY STEP	
1	Roll basic damage from the weapon (e.g. 2d+1). This number drives both injury and knockback.
2	Subtract armour: penetration = damage − (DR + Armour Divisor). If DR ≥ that, nothing gets through (see Blunt Trauma). AD scales the armour, not the roll: standard AD 1 = full DR · heavy blaster / military AD 2 = half DR · ion AD 5 (anti-droid) · disruptor AD 10 · lightsaber AD ∞ = ignores DR (vs non-cortosis).
3	Apply wound multiplier to penetration by damage type & location (see Damage Types): injury = penetration × mult. Vitals x3, Skull x4, etc.
4	Resolve location effects: crippling, major wound (> HP/2) → HT vs stun + knockdown), bleeding / cauterisation, knockback (below & in Hit Location).
5	Subtract injury from HP and apply shock; then check Reeling / Consciousness / Death as thresholds are crossed.
Worked: bolt rolls 8, target DR 6, weapon AD 2 → eff DR 3 → pen 5 → tib-burn x1 = 5 HP. To Vitals: x3 = 15 HP (major wound).	

DMG DAMAGE TYPE EFFECTS & MULTIPLIERS				
Multiplier applies to penetration (after DR). Living: meat & bone · Un-living: vehicles, droids, walls · Homogenous: solid mass.				
TYPE	LIV	UN-L	HOM	NOTES
Burning burn	x1	x1	x1	Ignites flammables. Tight-beam burn (lasers) reaches eye/vitals; some AD 2.
Corrosion cor	x1	x1	x1	Acid. Erodes DR −1 per 5 dmg (permanent).
Crushing cr	x1	x1	x1	Blunt trauma. x2 vs neck (snap/strangle). Easier knockback (full).
Cutting cut	x1.5	x1	x1.5	Severs limbs on a crippling injury. Knockback at half.
Fatigue fat	FP	FP	FP	FP damage, not HP. Stun bolts, tasers, exhaustion.
Impaling imp	x2	x1	x½	Spears, arrows, lightsabers (imp/burn). x3 vitals. Limbs x1 cap. No knockback.
Piercing pi-/pi+/++	½/1/1.5/2	¼/½/¾	1/4/½/¾	Pistol → rifle → cannon. x2 vitals from pi+ up. No knockback.
Toxic tox	x1	—	—	Radiation, poison, disease; bypasses DR partially (sealed armour stops it). Living only.

W N D WOUNDS, CONDITIONS & DEATH	
Shock (turn you lost HP)	Next turn: −(HP lost) to DX, IQ, skills — cap −4 (brain −8). High Pain Threshold ignores it.
Major Wound (> HP/2)	HT. Fail = stunned (lose turn, def −4, HT each turn); crit fail = unconscious. If standing, HT or knocked prone.
Reeling (HP ≤ ½)	Move & Dodge halved (round up) until healed above ½.
Consciousness (HP ≤ 0)	HT at start of each turn. Fail = unconscious. Success = may still act.
Death checks	HT at −1x, −2x, −3x, −4x HP or die (crit fail = die). Hard to Kill bonus. ≤ −5x = auto-dead; ≤ −10x = body destroyed.
FP fatigue	FP ≤ ½: Move/Dodge halved, ST halved for dmg, skills −2. FP ≤ 0: HT to act, DX/IQ halved. FP ≤ −1x = unconscious.
Mental stun	Lose next turn, def −4. IQ each turn to recover (CR +6, never freezes in surprise).
SPECIAL DAMAGE OUTCOMES	
Knockback	Cr (full) & cut (half) only; not imp/pi. 1 m back per full multiple of target ST−2 in basic damage (before wound mult), whether or not it penetrates DR. Knocked 2+ m → roll best of DX/Acrobatics/Judo or fall prone (−1/m beyond 1st). Into a wall: 1 HP or per metre not travelled.
Blunt Trauma	Flexible armour (vest, mesh, leather) that stops a hit still transmits 1 HP crushing per 5 pts stopped (round down), ignoring DR. Rigid armour (plate, ceramic) does not. Not from energy/burn.
Bleeding	Triggers: Neck/V/A, or any cut > ½ HP to a limb. Each turn HT or lose 1 HP ; First Aid roll stops it. Lasts the engagement if untreated.
Cauterisation SW	Lightsaber wounds: full dmg & all effects but no bleeding ; any sever/cripple is permanent (Force-heal/prosthetic only). Blaster bolts bleed at half rate; slughtrowers bleed normally.
