

ONE TURN	① Choose a maneuver. Your move + your action (table at left).	② Attacking? Roll 3d6. You hit if the roll is ≤ your effective skill.	③ They defend. Defender picks ONE → Dodge, Parry or Block – 3d6 ≤ it.	④ Undefended hit → roll damage on the weapon's dice.	⑤ –DR, *type, apply to HP. Then check shock / major wound.	🔄 Next combatant in Basic-Speed order.
----------	---	---	---	--	--	--

THE TURN — COMBAT MANEUVERS					
Turn order: highest Basic Speed (HT+DX)+4 first; tie → higher DX, then 1d6. Surprised side acts after & may only Do Nothing with no active defences (DR still applies); Combat Reflexes negates the freeze. Pick ONE maneuver (Blocks ②–③), then layer modifiers (④ attacks; ⑤–⑥ defences). Use: M melee · R Ranged · M+R both · MA Martial-Arts technique.					
MANEUVER / MODIFIER	USE	NOTES	MOVE	DEFENCE	
③ ALL-OUT ATTACK — sacrifice ALL active defences for a better attack. Step or full Move. HOUSE offensive QA/SR & Fast-Draw stay legal; defensive ones do not.					
AoA (Determined)	M+R	+4 to hit. Single attack.	Half	None	
AoA (Strong)	M	+2 dmg or +1 die if better. Thr/sw only – not force swords.	Half	None	
AoA (Double)	M+R	Two attacks, same/different targets. May swap one slot for Rapid Strike, DWA, or Feint.	Half	None	
AoA (Feint)	M	Free Feint, then a normal Attack with the margin applying. Same target.	Half	None	
AoA (Long) MA	M	Reach +1 for the attack, no hit penalty. Swing –2 dmg / –1 per die.	Half	None	
④ ALL-OUT DEFENCE — sacrifice your attack to focus on defence. Step permitted.					
AoD (Increased)	M+R	+2 to ONE chosen Active Defence.	Step	+2 one	
AoD (Increased) – Balanced MA	M+R	Alternative: +1 to TWO different defence types instead of +2 to one.	Step	+1 two	
AoD (Double)	M+R	Two Active Defences vs the SAME attack. Different types, or two parries w/ different weapons. Not two Dodges. 2nd takes multi-def penalty.	Step	2 def/atk	
⑤ STANDARD MANEUVERS — normal one-attack or non-attack maneuvers. Defences normal.					
Attack	M+R	One attack with any ready weapon. May add Block ④ modifiers.	Step	Any	
Defensive Attack MA	M	One attack at –2 dmg (or –1 die, worse) Pick ONE: +1 to one defence; DR +2 vs Leg Grapples & +2 DX vs falling on kicks; DR parry with same balanced weapon used to attack.	Step	+1 one	
Committed Attack (Det.) MA	M	One melee attack +2 hit. Step or 2 steps (2nd → –2 hit). Attacking limb can't defend; other defences –2. No retreat.	Step+2	–2 / 0	
Committed Attack (Strong) MA	M	One melee attack at normal skill +1 dmg. Thr/sw – not force swords. Movement & defence as Det.	Step+2	–2 / 0	
Move and Attack	M+R	Full Move + one attack. Melee –4, max skill 9. Ranged –2 or Bulk (worse). No retreat. No Rapid Strike.	Full	Dodge/Block	
Aim	R	+Acc 1st turn, +1 each 2nd & 3rd (cap +2 over Acc) Spoiled if you defend (W/roll to retain)	Step	Any*	
Evaluate	M	+1 (H) / +2 (Z) / +3 (3+) on next attack. Cancels foe Deceptive on YOUR defence until you attack.	Step	Any	
Feint	M	QC best Melee/Unarmed/Clash (or DX) vs their best weapon skill or DX. Your winning margin = the penalty to ONE of their active defences vs your next attack (next turn). Defensive Feint: that penalty instead applies to their next attack on you.	Step	Any	
Move	M+R	Run at full Move. Sprint: up to +20% Move from your 2nd straight turn.	Full	Any	
Change Posture	M+R	Stand / sit / kneel / crawl / prone / face-up.	None	Any	
Ready	M+R	Draw, reload, change grip/reach, clear a jam, prepare an item.	Step	Any	
Concentrate SW	M+R	Sustained mental effort – required for Force powers tagged Concentrate. If hit, W/roll or lose concentration AND any FP spent.	Step	Any*	
Wait	M+R	Wait for a trigger; fires before the triggering action. Move & Defence per the specified action.	None*	*	
Do Nothing	M+R	Start of combat or when stunned. Defence –4 if stunned. HT/10 to recover.	None	Any*	
⑥ ATTACK MODIFIERS — layer WITH/On Attack / Committed / AoA / Defence / M&A maneuver. Melee-only: Deceptive, Rapid Strike, Beat, Ruse, Combination.					
Deceptive Attack	M	–2 hit → –1 to foe's defence (no cap beyond skill) Stacks w/ Targeted, Committed, AoA. Contradicts Telegraphic. Evaluate cancels it on YOUR defence (net 0).	*	*	
Dual-Weapon Attack	M+R	Two attacks, one per hand, each –4 (–8 off-hand without Ambidexterity / Off-Hand Training) Cannot combine w/ Rapid Strike same turn.	*	*	
Rapid Strike	M	Two attacks, single weapon (or unarmed) each –6 (–3 w/ TbaM or WM). Melee only – for ranged use RoF.	*	*	
Targeted Attack	M+R	Aim for a specific hit location (penalty per chart). Wound effects apply there. Repeating same target → +1 to their defence on 3rd+ try.	*	*	
Telegraphic Attack	M+R	+4 hit; target gets +2 defence. Stacks w/ Rapid Strike, Targeted, Committed. Contradicts Deceptive.	*	*	
Wild Swing	M+R	Skill capped at 9; attack a target you cannot clearly see (fear, dark, obscured).	*	*	
Beat MA	M	Within Feint: QC your ST-based weapon skill vs their ST/DX weapon skill. Win → ONE named defence penalised by your margin, vs ALL attackers, until end of your next turn. Requires you parried them (or vice-versa) last turn, or they're grappled.	*	*	
Ruse MA	M	Within Feint: QC your Q-based weapon skill vs their Per-skill / DX-skill / Tactics. Win → ONE defence penalised by your margin, vs your next attack only.	*	*	
Combination MA	M	Trained multi-strike sequence. Buys off Rapid Strike penalty per level. One per maneuver, max. Not w/ M&A.	*	*	
⑦ DEFENCE OPTIONS — avoid, mitigate, or eat the attack. Once per turn unless noted.					
Retreat (Any)	M+R	Step back 1/10 Move (in 1 m) +3 Dodge or fencing/Box/Judo/Karate Parry; +1 other Parry/Block. Costs your step. Not vs a grapple.	*	*	
Acrobatic Dodge	M+R	Roll Acrobatics → +2 Dodge on success, –2 on failure. Crit fail: fall. Once/turn.	*	*	
Feverish Defence MA	M+R	Spend 1 FP → +2 to one defence. Once/turn. Not during Committed/AoA. Crit fail: 1HP injury.	*	*	
Sacrificial Dodge	M+R	Dodge –2; take a hit for an adjacent ally. Cannot use after AoA/Committed/M&A. Ends prone.	*	*	
Movement Defences MA	M	DWA & Drop –1 retreat, end prone. Side slip: stop sideways same dir. –1 retreat (standing) Slip: stop CLOSER. –2 retreat; counters Stop Thrust at –1.	*	*	
Defensive Grip MA	M	[WEAPON only] Hold weapon close: +1 Parry vs frontal; –2 to your attacks; reach –1. Switch grip = a Ready.	*	*	
⑧ COUNTER-ATTACK & PUNISHING DEFENCES — defences that strike back or set up your next attack with a penalty on the foe.					
Riposte MA	M	[armed/unarmed] On a parry, accept –1 to –4 off your Parry (floor 8 before Enh Parry & CB) success → your first attack next turn on that foe forces them to defend at the SAME penalty you took (take –3 → they're at –3). Full penalty hits the matching defence (parried weapon → Parry, shield → Block, unarmed → Dodge) half (round down) on other defences. Riposte is a Deceptive Attack – don't stack Deceptive.	*	*	
Counterattack MA	M+R	[armed/unarmed] Hard tech, default skill –5. After a successful Dodge/Parry/Block → your next attack on that foe (his turn or next) penalises their defence by a flat –2 (no defensive risk like Riposte, but smaller & fixed) Can't combine with Riposte same turn.	*	*	
Stop Hit MA	M	[armed/unarmed] Wait variant. Both attack on trigger; lower-margin attacker defends at –1 (–3 if parrying with the attacking weapon) Stops melee charges.	*	*	
Stop Thrust	M	[thrust wpn / punch] Wait variant vs a charging foe, +1 dmg per 2 m of their Move, max +3. Knockdown interrupts their attack.	*	*	
Aggressive Parry MA	M	[armed OR unarmed] Parry –2 → strike the attacking limb (uses their HP for crippling) Unarmed = thrust crushing; armed = your weapon's thrust (sabers cut clean) Crit fail: self-injury.	*	*	
Hand-Clap Parry MA	M	[UNARMED only] Karate –2; bare hands parry AND grapple a small weapon (knives, fists). Needs a free hand. Not polearms / sabers.	*	*	

ATK MAKING AN ATTACK — THE UNIVERSAL ROLL	
Every attack is 3d6, roll-under. Work out your effective skill, roll 3d6, and you hit if the roll is ≤ that number. Low is good — a 3 or 4 is always spectacular.	
Effective skill	Base weapon / unarmed skill + bonuses – penalties (posture, Deceptive, range, cover, light...). Melee mods here: ranged → Page 2.
Hit / miss	Roll ≤ skill = hit. Roll > skill = miss.
Margin	Effective skill – your roll. Drives burst hits, Feints & locks.
Who defends	Target gets one free active defence per attack (a Reaction). Extra defences that turn: –4 each (–2 if trained).
Crit ranges	Crit hit: 3–4 always · 5 if skill ≥ 15 · 6 if skill ≥ 16. Crit miss: 18 always · 17 if skill ≤ 15. Full table →

CRIT CRITICAL SUCCESS & FAILURE	
Crits success: nat 3–4 always; nat 5 if skill ≥ 15; nat 6 if skill ≥ 16. Crit failure: nat 18 always; nat 17 if skill ≤ 15; margin of failure ≤ 10.	
Defence crit: auto-defend + attacker is off-balance. C2DX, defences & skills until they Ready. Crit Parry = free Aggressive Parry to attacking limb; Crit Dodge = 1m free step; Crit Block drives attacker back. Crit fail (def): auto-fall + attacker may roll Crit Hit.	
Skill/HT/Will/IQ crit: success = ideal/quick resist; fail = worst/lingering (2 FP on Force SW).	
HOUSE Crit Hit → Counter-Crit Defence. On a critical hit the defender MAY still attempt an active defence, but it succeeds ONLY on a critical defence of its own (nat 3–4; 5 at def ≥ 15; 6 at def ≥ 16) — else the hit lands. DR still applies; damage rolled normally then modified per throw. Extra defences take the multi-def penalty & each needs its own crit. Lightsaber Parry SW as critical but it follows the same rule.	

3D	CRITICAL HIT	CRITICAL MISS
3–4	3: Max dmg + auto major wound (HT –5 vs stun). 4: Triple damage.	3: Stab self, full dmg. 4: Drop weapon + trip prone (DX–4).
5	Doubled damage.	Hit yourself for half damage.
6	Damage ignores DR.	Drop your weapon (Ready to recover).
7	Defender stunned (HT to recover, def –4 while stunned).	Whiff — lose your attack.
8–10	Normal damage, no extra effect.	Lose your attack; turn over.
11	Defender drops weapon.	You drop your weapon.
12	Knockdown – defender prone.	Fall prone (DX or Acro to avoid).
13–14	Defender stunned (HT each turn).	Hit randomly in melee range.
15–16	Major wound regardless of dmg, HT or stun + knockdown.	Weapon damaged – HT or breaks next use.
17–18	17: HT at –5 or die. 18: Outright kill.	17: Weapon broken. 18: Broken + fall + self-injury.

DEF ACTIVE DEFENCES & MULTI-DEFENCE	
Dodge	Basic Speed +3, drop fractions; –en cumbrance; +1 Combat Reflexes; +Enhanced Dodge; +DB (shield).
Parry	Skill +2+3, drop fractions; weapon mod; +CR; +Enh Parry; retreat bonus. Off-hand –4 without Ambidexterity.
Block	Block skill +2+3, drop fractions; +CR; +Enh Block; +DB. Needs ready shield, buckler, or cloak.
Parry vs Ranged HOUSE	Lightsaber Parry parries ranged attacks (blaster bolts, slug rounds) as a normal Parry — same skill, no special modes. It also always parries Force Lightning, but a successful parry forms a Lightning Lock (see Saber Lock box) instead of simply scattering it. Other weapons cannot parry ranged.
Multi-def RAW	–4 cumulative per defence after the first (–4, –8, –12...). Hard ceiling.
Multi-def TbaM/WM	–2 cumulative per defence after first — ONLY for the trained weapon/skill. Others use RAW –4.
Side facing	–2 to all active defences.
Rear facing	If unaware: NO defence — hit lands. Must first become aware (Per roll, CR, or Danger Sense); then –4, 360° Vision SW as side, –2.

GRP GRAPPLING		
Close-combat at range only. Grappled = –4 DX, can't move freely. While grappled: no retreat; no parry w/ grappled arm; no Sacrificial Dodge.		
ACTION	ROLL	EFFECT
Grapple	DX/grappling skill vs target's active defence	Target –4 DX, can't move freely. Two hands on one body part: +3.
Takedown (req Grapple)	QC your ST or DX (best) vs theirs	Win = foe prone, grapple persists. Tie/loss = foe stands.
Pin (req Takedown)	QC ST vs ST. +3 two hands, +3 size. –4 grappled	Win = foe helpless; attackers hit automatically.
Choke (neck)	Neck grapple + QC ST (+3 HT) vs HT	Cr dmg (margin = HP), bypasses torso DR. Carotid: 2nd rd → HT or KO. Trachea: 10 s → HT or KO.
Strike / Break Free	Strike –4; Break Free QC ST vs theirs	Strike: dmg only, grapple persists. Break Free: win = escape + free step; costs full turn.

HOUSE TURN ECONOMY — QUICK ACTION & SPECIAL REACTION	
Your turn = ONE maneuver: a free active defence vs each attack you can perceive (out of turn — no maneuver cost); any number of Free Actions · 10 Quick Action · 1 Special Reaction (Force). Quick Action rides alongside your maneuver: Force Push / Pull (full FP). Fast-Draw, or a single-touch device activation — defensive QA is forbidden during All-Out Attack, offensive QA & Fast-Draw stay legal. Special Reaction (Force-only, full FP) is a triggered Force Push / Pull layered on an active defence and does not spend the defence slot — defensive use (redirect a threat) is forbidden during AoA, offensive use (shove/pull a foe) is legal.	

CMB COMBINATIONS & MANEUVERS	
Which attack modifiers and maneuvers legally stack together.	
ATTACK MOD	LAYERS WITH
Deceptive	Rapid Strike · Targeted · Committed · AoA. Not Telegraphic. Melee.
Telegraphic	Rapid Strike · Targeted · Committed. Not Deceptive. Melee.
Rapid Strike	Deceptive · Telegraphic · Targeted, –6 ea (–3 TbaM/WM). Melee.
Targeted	Almost anything — melee & ranged Aim.
Feint/Beat/Ruse	Sets up your NEXT attack. Melee.
Dual-Weapon	Two ready weapons; off-hand –4 w/o Ambidexterity.
MANEUVER — ATTACKS · YOUR DEFENCE	
Attack	any + compatible mods · defend normally
Committed	Determined / Strong + Deceptive / Rapid / Targeted · limited defence, no retreat
All-Out Atk	Determined / Double / Strong / Long + mods: NO defence (offensive QA/SR & Fast-Draw legal)
Move & Atk	skill cap 9; Telegraphic ok · Dodge/Block only
All-Out Def	no attack · +2 one / +1 two / Double vs same attack

RES DAMAGE RESOLUTION — STEP BY STEP	
1	Roll basic damage from the weapon (e.g. 2d+1). This number drives both injury and knockback.
2	Subtract armour: penetration = damage – (DR + Armour Divisor). If DR ≥ that, nothing gets through (see Blunt Trauma). AD scales the armour, not the roll: standard AD 1 = full DR · heavy blaster / military AD 2 = half DR · ion AD 5 (anti-droid) · disruptor AD 10 · lightsaber AD ∞ = ignores DR (vs non-cortosis).
3	Apply wound multiplier to penetration by damage type & location (see Damage Types): injury = penetration × mult. Vitals ×3, Skull ×4, etc.
4	Resolve location effects: crippling, major wound (> HP/2 → HT vs stun + knockdown), bleeding / cauterisation, knockback (below & in Hit Location).
5	Subtract injury from HP and apply shock, then check Reeling / Consciousness / Death as thresholds are crossed.
Worked: bolt rolls 8, target DR 6, weap on AD 2 → eff DR 3 → pen 5 → tib-burn ×1 = 5HP. To Vitals: ×3 = 15HP (major wound).	

DMG DAMAGE TYPE EFFECTS & MULTIPLIERS					
TYPE	LIV	UN-L	HOM	NOTES	
Burning burn	×1	×1	×1	Ignites flammables. Surface hits only — can't target Eye/Vitals (see Tight-Beam). Flamethrowers, fire fields, explosions.	
Tight-Beam tib-burn	×1	×1	×1	SW Blaster bolts & lasers. Focused beam qualifies as a penetration type — reaches Eye (<4) / Vitals / Heart like imp/pi. Standard AD 1: heavy / military AD 2. Cauterises (half-rate bleed).	
Corrosion cor	×1	×1	×1	Acid. Erodes DR –1 per 5 mg (permanent).	
Crushing cr	×1	×1	×1	Blunt trauma. ×2 vs neck (snap/strangle). Easier knockback (full).	
Cutting cut	×1.5	×1	×1.5	Severs limbs on a crippling injury. Knockback at half.	
Fatigue fat	FP	FP	FP	FP damage, not HP. Stun bolts, tasers, exhaustion.	
Impaling imp	×2	×1	×½	Spears, arrows, lightsabers (imp/burn). ×3 vitals. Limbs ×1 cap. No knockback.	
Piercing pi-/pi+/++	½/1/1.5/2	½/½/½/½	¼/¼/¼/¼	Pistol → rifle → cannon. ×2 vitals from pi+ up. No knockback.	
Toxic tox	×1	—	—	Radiation, poison, disease; bypasses DR partially (sealed armour stops it). Living only.	
Ion ion	×1	×1	×1	SW Magnetic concussion. AD 5 + HT/shutdown vs droids/vehicles (ion-shielded resist; ruptures flesh as cr (AD 1); bypasses energy shields (kinetic).	

WND WOUNDS, CONDITIONS & DEATH	
Shock (turn you lost HP)	Next turn: –(HP lost) to DX, IQ, skills — cap –4 (brain –8). High Pain Threshold ignores it.
Major Wound (> HP/2)	HT. Fail = stunned (lose turn, def –4, HT each turn); crit fail = unconscious. If standing, HT or knocked prone.
Reeling (HP ≤ ½)	Move & Dodge halved (round up) until healed above ½.
Consciousness (HP ≤ 0)	HT at start of each turn. Fail = unconscious. Success = may still act.
Death checks	HT at –1x, –2x, –3x, –4x HP or die (crit fail = die). Hard to Kill bonus: ≤ –5x = auto-dead; ≤ –10x = body destroyed.
FP fatigue	FP ≤ ½: Move/Dodge halved. ST halved for dmg skills –2. FP ≤ 0: HT to act. DX/IQ halved. FP ≤ –1x = unconscious.
Mental stun	Lose next turn, def –4, IQ each turn to recover (CR +6, never freezes in surprise).

SPECIAL DAMAGE OUTCOMES	
Knockback	Cr (full) & cut (half) only; not imp/pi. 1m back per full multiple of (target ST–2) in basic damage (before wound mult), whether or not it penetrates DR. Knocked 2m → roll best of DX (Acrobatics) / Judo or fall prone (–1 m beyond 1st). Into a wall: 1HP or per metre not travelled.
Blunt Trauma	Flexible armour (vest, mesh, leather) that stops a hit still transmits 1HP crushing per 5 pts stopped (round down), ignoring DR. Rigid armour (plate, ceramic) does not. Not from energy/burn.
Bleeding	Triggers: Neck/VIA, or any cut > ½ HP to a limb. Each turn HT or lose 1HP; First Aid roll stops it. Lasts the engagement if untreated.
Cauterisation SW	Lightsaber wounds: full dmg & all effects but no bleeding; any sever/cripple is permanent (Force-heal/prosthetic only). Blaster bolts bleed at half rate; slugthrowers bleed normally.

KB KNOCKBACK & HEAVY IMPACT	
Knockback	Per full (ST–2) of a blow's basic damage (before the wound multiplier), the target is shoved Thex. Crushing = full · cutting = half · impaling/piercing = none (they punch through). Happens even if DR stops the wound.
Falling down	Shoved Thex = stay up. 2+ hexes → roll best of DX / Acrobatics / Judo or fall prone (–1 per hex past the force).
Into a wall	Slammed into ahead object → +1HP crushing per metre not travelled (the stop you didn't get to make).
Heavy Impact HOUSE	Cannon-class weapons (assault/blaster cannons, rockets) knock back like crushing even when they burn and even when DR stops the bolt. Rigid plate that stops one still passes 1HP crushing per full 10 stopped (concussion through plate). Beskar stops the bolt — not the shove.

HIT-LOCATION DIAGRAM

DO-NOT-MODIFY REFERENCE PLATE

EYES (-9)

Miss by 1 hit skull or face
 Dam > 1/10 HP blinds
 As skull w/o DR

HEAD (-5)

Roll 1d
 1 Eyes
 2-4 Skull
 5-6 Face

BODY

Roll 1d
 1 Neck
 2-5 Torso
 6 Groin

VITALS (-3)

Heart, Lungs,
 Kidneys, etc.
 Tightbeam burn x2,
 imp & pi x3

MAJOR WOUND

Any single injury > 1/2 HP.
 Cripples limb also counts
 as a Major Wound.
 When you receive a MW you
 must make a HT check to
 avoid knockdown and stun.

LESS THAN 1/3 HP

Halve DX and Move.

0 HP OR LESS:

Make a HT check next turn to
 remain conscious (-1 to HT
 check per full -HP), and on
 beginning of each turn you
 chose to take any action
 including an active defense.

-1 x HP

Make a HT check or die.

-5 x HP

Character dies immediately.

3-4 SKULL (-7)

Miss by 1 hit torso, DR+2;
 dam x4 knockdown at -10

5 FACE (-5)

Miss by 1 hit torso
 Roll vs knockdown at -5

17-18 NECK (-5)

Miss by 1 hit torso
 Crush x1.5 cutting x2

8 RIGHT ARM (-2)

Pi++, pi+, & imp are x1
 Dam > 1/2 HP cripples

9-10 TORSO (-0)

Roll 1d
 1-2 = Vitals, imp, pi,
 and tight beam burn only

12 LEFT ARM (-2)

Pi++, pi+, & imp are x1
 Dam > 1/2 HP cripples

11 GROIN (-3)

Males get shock x2 from crush
 Roll vs knockdown at -5

15 HAND (-4)

Roll randomly right/left
 Pi++, pi+, imp are x1
 Dam > 1/3 HP cripples

6-7 RIGHT LEG (-2)

Pi++, pi+, & imp are x1
 Dam > 1/2 HP cripples

13-14 LEFT LEG (-2)

Pi++, pi+, & imp are x1
 Dam > 1/3 HP cripples

16 FOOT (-4)

Roll randomly right/left
 Pi++, pi+, & imp are x1
 Dam > 1/3 HP cripples

LOC HIT LOCATION & CRIPPLING (HUMANOID)				
Random hit (3d): match first column. Targeted: aim anywhere, pay the to-hit penalty. Dmg types = what can reach that location (others hit Face/Torso). Cripple = single-hit injury threshold; cutting across it = severance. Major wound (> HP/2) → HT vs stun + knockdown. The weapon — not the motion — sets the damage type.				
3D	LOCATION	HIT	DMG TYPES	CRIPPLE / EFFECT
3–4	Skull / Brain	–7	All	Skull DR 2. Penetrating ×4 wound. Major → HT –10 or unconscious + knockdown. Miss by 1 → Torso.
5	Face	–5	All	Crits read on row better. Cr → knockdown HT –5. Cor → HT or blinded. Miss by 1 → Torso.
–	Eye (target)	–9	imp/pi/tib-burn	Cripple HP/10 = blinded that side. ×4, no DR. Both = blind. Force Sense remains SW.
6–7 13–14	Leg	–2	All; imp/pi/pi++×1	Cripple HP/2. Move 1, fall prone (DX to avoid), no kick. Dmg capped at limb HP. Cut cripple = severance.
8 · 12	Arm	–2	All; imp/pi/pi++×1	Cripple HP/2. Drop everything held; no attack/parry/grapple/w/limb. Cut cripple = severance.
9–10	Torso	0	All — standard	Standard injury. Within Torso: Vitals –3, Heart –5 (below).
11	Groin	–3	All	Cut/pi/imp = auto major wound. Males: cr×2 shock (cap –8). Stun, –5 DX for 2d turns. Knockdown HT –5.
–	Spine (target)	–8	cr/cut/imp/pi/pi-tib-burn	Cripples both legs (lower) DR both arms (upper). Severance = paralysis below the cut.
15	Hand	–4	All; imp/pi/pi++×1	Cripple HP/3. Drop everything; cannot grasp or wield. 2H needs both hands.
–	Neck Vein/Artery (t)	–8	cut/imp/pi/tib-burn	+1.5 dmg HT each turn vs bleeding (1HP/turn) until first aid. Severance = death in seconds.
16	Foot	–4	All; imp/pi/pi++×1	Cripple HP/3. Move halved; –2 DX for footwork (no Acro Dodge, no Retreat bonus).
–	Arm/Leg Joint (t)	–7	cr/cut/imp/pi/tib-burn	Cripple HP/4 (half normal limb). Joint often locks. Effects per parent limb.
17–18	Neck	–5	All; cr×1.5, cut×2	Severance ends combat. Major → HT or stun. Miss by 1 → Torso.
–	Vitals (target)	–3	imp/pi/tib-burn	×3 wound mult. Penetrating = major wound → HT or stun. Can't be crippled but can kill.
–	Heart (target)	–5	imp/pi/tib-burn	As Vitals (+3) + auto major wound on any penetration. Death very likely.

POS POSTURE		
POSTURE	ATK/DEF	TO HIT YOU · MOVE
Standing	0 / 0	Normal · Full Move
Crouching	–2 / 0	–2 ranged to hit you (from outside C) · Move ×½
Kneeling	–2 / –2	–2 to hit you · Move ×½
Sitting	–2 / –2	–2 to hit you · Move 0 (M&A) hex
Crawling	–4 / –3	+2 close / –2 ranged to hit you · Move 1 hex
Prone / Supine	–4 / –3	+3 close / –2 ranged to hit you · no Move

ONE SHOT	① Aim (optional). Adds +Acc to next turn's shot.	② Effective skill = weapon skill + size + speed – range – cover/posture/light.	③ Roll 3d6 ≤ skill.	④ Target reacts: Dodge, dive or take cover. No Parry/Block vs bolts (except saber Deflect).	⑤ Burst hits = 1 + [margin + Rcl] bolts (cap RoF).	⑥ Each bolt: –cover DR, then armour DR + AD.
----------	--	--	---------------------	---	--	--

REACT REACTIONS — EVERYTHING YOU CAN DO ON SOMEONE ELSE'S TURN		
These happen out of turn , triggered by an attack, at no maneuver cost . First your active defence — one per attack you can perceive (none vs a rear / surprise hit); each <i>extra</i> defence that turn is −4 cumulative (−2 with a Trained-by-a-Master / Weapon-Master skill). You also get 1 Special Reaction (Force) that does not spend the defence slot.		
KIND	THE OPTIONS	WHAT THEY ANSWER · COST
Active defence (the free one)	Dodge · Parry · Block	Dodge: anything you can see. Parry: a melee weapon in hand — a lit saber also parries bolts & thrown objects. Block: a ready shield / buckler / cloak / gauntlet (also stops bolts).
Defence add-ons	Retreat · Acrobatic Dodge · Feverish Defence · Dive for Cover · Sacrificial Dodge	Retreat (+3 Dodge / fencing & unarmed Parry, +1 other; 1/foe; costs your step; not vs ranged or a grapple). Acrobatic Dodge (+2 / −2, 1/turn). Feverish (1 FP → +2, not in AoA). Dive for Cover & Sacrificial Dodge → see BLAST & GUARD .
Counter-defences (ride a successful defence — no Reaction spent)	Riposte · Counterattack · Aggressive Parry · Stop Hit / Thrust · Saber Bind · Bolt Deflect / Reflect	Strike back or set up your next attack off a defence (Page 1 ①). Saber Bind (2 FP) locks blades on a successful saber Parry. Bolt Deflect scatters a parried bolt; Reflect (−4) sends it back at the shooter.
Force reactions SW	Special Reaction · the counter-powers	Special Reaction (Push / Pull, 1/turn, free of the defence slot). Counter-powers (each spends your Reaction): Equilibrium / Rebuke / Greater Rebuke cancel · Inversion / Mirror reflect · Anchor breaks domination. Tutaminis catches energy as a Parry. Lightning Lock : a lit saber vs Force Lightning.
Attacks as a reaction	Stop Hit · Stop Thrust · Bolt Reflect · offensive Special Reaction	A plain attack is never a Reaction. The only ways to hit out of turn: a Wait maneuver set up earlier (Stop Hit / Stop Thrust fire on the foe's trigger), turning a parried bolt back at the shooter, or a Special Reaction shove / pull. Riposte & Counterattack don't strike now — they penalise the foe's defence on your next turn.

GUARD DEFENDING FOR AN ALLY & THE THROWN SABER	
To defend another body you must be able to reach the attack – with your own body, your blade, or the Force. You can't cover someone across the room.	
Body interpose (anyone)	Sacrificial Dodge : dive in front of an adjacent ally (1 hex). Dodge –2 – success, the attack misses; failure, you take it instead. You end prone . Works vs melee or a bolt (incl. screening a downed ally from a crit). Not from prone; not after AoA / Committed / Move&Attack. Uses a defence (multi-def after).
Blade / shield interpose HOUSE	Needs a Protective stance (Soresu & guardian arts): as your Reaction, Block or Parry an attack aimed at a chosen ally within your weapon's reach (saber reach 1–2 hex), +3 , interposing as a free action 1/turn . Without that stance a normal Parry/Block guards only you – for an ally you must body-block (above).
Force redirect SW	Special Reaction (Push/Pull, 1/turn, does not use your defence slot): shove a threat off-line, or shove self or an adjacent ally clear. QC vs attacker skill. Forbidden during AoA / AoD.
THE THROWN SABER — RECALL & THE GUARDIAN THROW	
Saber Throw (RAW)	An Attack (your maneuver), not a Reaction – and while the blade is in flight you cannot Parry . FP recall is built in: 4 FP → returns at the start of your next turn • 6 FP → snaps back the same turn at end of your action. A Force-sensitive target may catch it (QC) → return delayed 1 turn.
Guardian Throw HOUSE	You may hurl the lit blade as a Reaction to guard an ally in throw range (10 hex) who is attacked – melee or bolt. It spends your Reaction (your free defence that turn) + the Saber Throw FP (4 / 6 above). Roll Lightsaber Parry –4 : success defends the ally just as if you'd parried for them (bolt → Deflect rules; melee → blocked). You are disarmed – no saber Parry for yourself – until the blade returns. Cannot interpose vs an area attack.

SW	HOW FORCE POWERS ARE DEFENDED
Every power card lists its Defence . The buckets:	
Dodge / Parry / Block	Physical Force attacks — telekinetic throws, hurled objects, Force-thrown sabers, and Force Lightning (lit saber → Lightning Lock). Normal active defences apply.
Resist — contest	Mind & body intrusions, never dodged: QC vs Will (fear, domination, illusion, mental horror), HT (bodily pain/agony, stun, drain), or ST (telekinetic grapple). Mind Block / Mind Shield always apply vs any mind-affecting power.
Force-on-Force	Powers attacking the Force connection (Drain Force, Sever, etc.): resist with Will or <i>your Force skill if higher</i> — that option is Force-on-Force only.
No defence	Self/ally buffs, senses, and powers stating "none" simply take effect.

HOUSE	SABER LOCK & LIGHTNING LOCK
Forms two ways: (1) On purpose — declare as your Attack if you parried them (or they parried you) last turn; the foe may break away by retreating a hex unless walled / pinned. (2) By accident — when two sabers clash (or a saber & a saber-resistant blade: beskar / cortosis / phrik / songsteel), roll 1d; on a 6 the blades catch . Ordinary blades are sheared — they never lock.	
EACH TURN, PICK ONE	EFFECT
Force / sword contest	QC of your Force attribute (ST Torrent · DX Velocity · Will Vessel · HT Tempered) — non-Force: higher of ST/DX. +1 per 2 ST over foe ; +1 two-handed; +1/pt SM; –2 bad footing. Not Lightsaber skill — the saber's up-to-+20 would auto-win.
Break away	Spend your turn, step out, end the lock. If the foe did not also break, they get the <i>Bend-the-guard</i> result on you as you turn aside.
Bear down	All-Out push: +2 to the contest this turn, but no active defence until your next turn.
Win by 1–2 bend guard (foe –2 defences vs you / shove 1 m) · 3–5 break guard (free attack +2 / shove + knockdown / disarm +2) · 6+ overpower (knockback + prone, or free attack +4) · tie blades stay locked, both –2 vs everyone else. Crit fail: fall prone, foe gets the 6+ result.	
SW Lightning Lock : a lit saber always parries Force Lightning; a successful parry forms a lock instead of scattering it. Sustained QC each turn — attacker rolls Force Lightning skill, defender rolls their Force attribute (+1 Tempered Blade, or Tutaminis if trained). Both pay FP (defender 1 FP per 4 dmg held). Defender wins by 6+ → redirect the storm at the caster (–2 their defence); loses by 3+ → full damage. Either may break off (defender Dodges clear).	

HIT

RANGED TO-HIT — SIZE · SPEED · RANGE

Effective skill = weapon skill + Size mod + Speed bonus – Range penalty + posture / cover / light. Distance & speed in metres (1 m = 1 hex; 1 hex/turn = 1 m/s). E.g. trooper (SM 0), still, at 30 m → -7 net.

SIZE	SM	SPEED	MOD	RANGE	MOD
20 m +	+6	≤ 2 m/s	0	≤ 2 m	0
10-15 m	+4/5	3 m/s	+1	3 m	-2
5-7 m	+2/3	5-7 m/s	+2/3	5-7 m	-3
3 m	+1	10 m/s	+4	10 m	-4
2 m	0	15 m/s	+5	15 m	-5
1.5 m	-1	20 m/s	+6	20 m	-6
1 m	-2	30 m/s	+7	30 m	-7
0.6 m	-3	50 m/s	+8	50 m	-8
0.5 m	-4	70 m/s	+9	70 m	-9
0.3 m	-5	100 m/s	+10	100 m	-10

Big = + (easier); small = -. Add to skill.
Human 0 · speeder +3 · AT-ST +5 · droid -2.

Faster = + (easier to track). Add to skill.
On-foot = no bonus; matters for vehicles.

Farther = - (harder). Subtract from skill.
150 -11 · 200 -12 · 300 -13 · 500 -14 · 1 km -16.

RNG RANGED — MODIFIERS, COVER & BLASTER FIRE		
Aim & Acc	+Acc on the shot after Aim; extra Aim +1 each, cap +2 over Acc. Move & Attack: skill cap, –2 or –Bulk (worse).	
Recoil & Bulk	–Rcl per shot after the first in a turn. –Bulk firing from M&A, snap-shot w/o Aim, or close combat.	
Target Move	–1 cross-walk, –2 cross-run, –3 sprint / erratic. (Target SM & range from the To-Hit table.)	
Concealment	Smoke / dim / fog –2 to –4 (to-hit only). Pitch dark: Wild Swing cap 9 / Hearing, Hurt / heavily hurt: –3 / –4 to all skills.	
Suppression HOUSE	RoF 5+ into a hex / doorway / short line (no specific target). Anyone in or crossing must Dodge vs your effective skill or be hit . Consumes the full burst.	
HOUSE lon-class skills: Ion Pistol · Ion Rifle · Ion Gunner (DX/A, no Blasters default). Ion = magnetic concussion: AD 5 + shutdown vs droids; ruptures flesh (cr, AD 1); bypasses energy screens.		
COVER — DR ABSORBED BEFORE DAMAGE REACHES YOU (SEPARATE FROM TO-HIT PENALTY)		
Wooden door / fence	DR 3	bolts pass after 1st hit
Sandbag wall	DR 12	absorbs bolts; degrades
Brick wall	DR 8–15	cracks under fire
Concrete wall	DR 24–100	heavy weapons eventually
Permacrete / durasteel SW	DR 50–200	structural
Hardened steel / blast door	DR 70+	heavy weapons / explosives
RATE OF FIRE — BURST HIT BONUS & RESOLUTION		
ROF	BONUS	RESOLUTION
1–4	+0	On a hit, bolts connecting = [margin + Rcl] + 1, capped at RoF.
5–8	+1	Defender rolls one defence; further incoming hits use the multi-def penalty (RAW –4 each). Stun bolt : dmg to FP (fat); FP ≤ 0 → HT to act; ≤ –1+FP → K0. Sealed/hardened armour may stop it.
9–12	+2	
13–16	+3	
17–24	+4	
25–49	+5	
50–99	+6	
100+	+7 /2×	
EX	WORKED EXAMPLE — CARBINE BURST	
Blaster carbine, RoF 10 , Rcl 2 , skill 14. Target at 10 m (–4) and walking (–1) → effective skill 9 , plus the +1 RoF-10 burst bonus = 10 .		
Roll 8 → hit; margin = 10 – 8 = 2. Bolts that connect = 1 + [2 ÷ 2] = 2 bolts . Roll each bolt's damage on its own; subtract the target's DR (÷ the weapon's AD) from each.		
BND	RANGE BANDS — WHAT EACH DISTANCE FEELS LIKE	
The to-hit penalty comes from the Range table at left. These bands tell you how a fight at that distance actually plays. 1 hex = 1 m .		
RANGE	PEN.	BAND & HOW IT PLAYS
0–2 hex	0	Point-blank . Close-combat & Bulk penalties apply; most defences available.
3–5 hex	–1/2	Brawling distance . Pistols ideal; long arms suffer Bulk up close.
7–10 hex	–3/4	Room-to-room . Burst fire devastating; cover is everything.
15–20 hex	–5/6	Hall / open room . Where most blaster fights settle. Carbines = rifles.
30–50 m	–7/8	Outdoor close . Aim essential; pistols fall off past 30 m.
70–100 m	–9/10	Medium . Rifle territory; multi-turn Aim. Many pistols hit their ½D here.
Farther: 150 m –11 · 200 m –12 · 300 m –13 · 500 m –14 · 1 km –16.		

RNG+	RANGED-ONLY RULES	
Forbidden w/ ranged	No Rapid Strike, Deceptive, Feint, Beat, Ruse or Combination. For more hits use Rate of Fire (bursts) — not melee tricks.	
Move and Attack	Full Move + fire: –2 or the weapon's Bulk , whichever is worse. (The skill-9 cap is melee-only.)	
Into a melee	–4 to single out a target in a scrum; miss badly → you may hit a random fighter in that hex (GM call).	
Gun at arm's reach	You can fire at reach C, but you can be parried, grabbed or grappled : long arms suffer Bulk. Pistols are the close choice.	
Aim	+Acc on next turn's shot; +1 per extra Aim (cap +2). Brace & stay still: a further +1 . Lose all Aim if you move or get hit.	
Two guns	One per hand: off-hand at –4 without Ambidexterity.	

DEF	DEFENDING AGAINST RANGED	
You must see it	No defence against a shot you're unaware of (rear/surprise). Aware → you may react.	
Dodge / dive	Dodge the shot, or dive for cover / drop prone (Movement Defence) to break line-of-fire.	
No Parry/Block	You can't Parry or Block a bolt — except a lit lightsaber's Deflect (and a few Force powers).	
Cover vs concealment	Cover = DR off the damage. Concealment = –to-hit only.	

STS STATUS EFFECTS — QUICK REFERENCE	
Stunned	No actions; defences –4 . Recover: HT roll (physical) or IQ (mental) at end of each turn. Combat Reflexes +6 vs mental freeze.
Shock	–1 per HP lost (cap –4) to DX/IQ skills on your <i>next turn only</i> . Not defences. High Pain Threshold negates.
Knocked down	Major wound / Face / Skull hit: HT roll or fall prone & drop what's held (fail by 5+; also stunned). Standing = a Change Posture maneuver.
Bleeding	Vitals/Neck wounds: HT each turn or lose 1 HP until tended (First Aid) – lightsaber & blaster burns cauterise (no bleed).
On Fire SW	1d–3 burn per turn (min 1) until out: drop & roll (DX) or smother (Ready action). Sealed armour protects until its DR is breached; fire fields burn 1d/turn.
Poisoned	HT roll to resist (at the toxin's listed number); fail = listed damage, often delayed or staged. Antitox injector: +3 HT & neutralises one known toxin. Sealed armour stops contact gas; cloth doesn't.
Electrified / Stun bolt	Stun settings & sonic: aff HT–N – fail = stunned (recover as above); damage goes to FP not HP . Electrified surfaces/shock-whips: HT or stunned + 1 FP per contact turn.
Suffocating	HT every 15 sec ; each fail = 1 FP. At 0 FP: 1 HP/turn until air. Vacuum adds 1d–1 burn per 5 sec (unsealed).
Droids	No shock, no bleeding, no FP – full effect until destroyed. Droid "stun" = ion stagger : lose 1 turn, defences –4, HT each turn to reboot.

Sheet automation: conditions toggle on the Combat tab and feed their penalties into the Skill Roller automatically.

½D	HALF-DAMAGE & MAX RANGE · COVER VS CONCEALMENT	
½D range	Listed on each weapon card. Past ½D, halve the damage — the bolt has bled off, the slug has slowed.	
Max range	Beyond it the shot cannot reach . Most blasters: ½D ≈ ½ of Max.	
Cover	Physical DR between you and the bolt . Subtract cover DR from the damage (see DR table). Does NOT change the to-hit roll.	
Concealment	Can't be seen clearly (smoke, dark, fog): –to-hit only , gives NO DR. Total whiteout → attacker uses Wild Swing (skill 9).	
Partial cover	Only part of you exposed → attacker eats the hit-location penalty for that part; cover DR still applies if the bolt clips the barrier.	

WPN COMMON RANGED WEAPONS — QUICK STATS									
Dmg = basic damage & type · AD = armour divisor (higher punches through more DR) · Acc = aim bonus · RoF = shots per turn · Rcl = recoil (–per extra hit in a burst) · ½D / Max = range in metres (past ½D, halve damage; past Max, can't reach) · Shots = before reload. Full catalogue lives on the character sheet. SW									
WEAPON	DMG	AD	ACC	ROF	RCL	½D / MAX	SHOTS	NOTES	
Hold-out blaster	1d+2 burn	1	1	3	2	50 / 500	30	Concealable backup; +Holdout.	
Blaster pistol	3d burn	1	3	3	2	100 / 1200	50	The everyday sidearm.	
Heavy blaster pistol	4d burn	3	3	3	3	120 / 1500	30	Punches plate (AD 3).	
Blaster carbine	4d+1 burn	1	4	10	2	200 / 1800	40	Trooper workhorse; bursts.	
Blaster rifle	5d burn	1	5	3	2	500 / 2500	50	Line-infantry standard.	
Assault blaster rifle	5d+2 burn	1	5	10	2	500 / 2500	50	Full-auto; stun setting.	
Blaster sniper rifle	6d+2 burn	1	6+2	1	2	1000 / 4000	20	Scoped — reward for Aim.	
Ion pistol (droids)	2d+2 ion	5	2	3	2	50 / 600	30	Anti-droid / anti-shield.	
Disruptor pistol	3d+2 cor ✕4	10	2	1	2	30 / 300	10	Illegal . Vaporises; AD 10.	
Heavy slug pistol	3d–1 pi+	1	2	3	4	120 / 1800	8	Kinetic — beats energy-weave.	
Slug sniper rifle	6d+1 pi+	1	6	1	4	800 / 4500	10	Kinetic — beats reflec.	
Mando repeating blaster	6d+6 burn	3	4	15	7	500 / 1000	100	Suppression; high Rcl.	

AOE EXPLOSIONS & AREA OF EFFECT

6d GRENADE — FALLOFF BY HEX

FALLOFF

	full
	÷3
	÷6
	÷9

The falloff rule. An explosion deals its **full listed damage at the centre hex**, then weakens as it spreads: **damage = centre ÷ (3 × hexes away)**. So 1 hex out is ÷3, 2 hexes ÷6, 3 hexes ÷9. The table below is pre-divided — just read across to the victim's hex.

Then armour. Apply the weapon's armour divisor & the victim's DR **after** falloff. Concussion is **cr** (plate resists); frag & shrapnel are **pi** (ignore shields); plasma/thermal is **burn** (energy). **SW**

PRE-COMPUTED FALLOFF — AVERAGE DAMAGE AT EACH HEX							
CENTRE	HEX 0	1 (÷3)	2 (÷6)	3 (÷9)	4	5-6	TYPICAL WEAPONS
3d (10)	10	~3	~2	~1	—	—	Cryoban, incendiary, sonic grenade
6d (21)	21	~7	~3	~2	~1	—	Frag, plasma / concussion, ion grenade
6d÷2 (42)	42	~14	~7	~5	~3	~2	Proximity mine, wrist rocket
6d÷3 (63)	63	~21	~10	~7	~5	~4	Thermal detonator, limpet, rocket launcher
6d÷4 (84)	84	~28	~14	~9	~7	~5	Plasma / thermal charge, missile tube

Dive for cover	See it coming → Dodge or Acrobatics to dive. Each hex you move out steps you down one column. Diving prone in-hex doesn't cut damage but can put cover between you & the blast.
Concussion stun	Even a non-wounding blast: HT vs the centre damage or be stunned (lose next turn). Brain-damage cap ~8 if very close.
Fixed-radius clouds	Gas/smoke/flash-bang fill a set radius at uniform effect (no falloff): flash-bang ~2 hex · gas ~3 · smoke ~4. HT resists; sealed armour negates gas.
Contained blast	Sealed room/corridor — the blast can't vent: shift one hex gentler (everyone takes ≥ the hex-2 value). Why a thermal det "guts a room".

VEL VELOCITY & “SMASH” DAMAGE — FALLS, SLAMS & COLLISIONS

Speed and mass hurt. These are all **crushing** and all cause **knockback**. **1 hex = 1 m, 1 turn = 1 s**, so hexes-per-turn = m/s.

FALLING — 1D-3 CRUSHING PER METRE FALLEN						
FALL	2 M	5 M	10 M	20 M	50 M	100 M+
Damage (cr)	2d-6	5d-15	10d-30	20d-60	~25	~50
Typical	~1	~3	~5	~10	~25	60+ cap
Softening it: best of DX, Acrobatics or Judo — success halves, critical quarters. Into water: half (low falls); clean entry (Acrobatics/Swim) halves again. Terminal velocity ~200 m/s → 200 m+ ≈ max.						

SLAM, SHOVE & CHARGE (ON FOOT)	
Slam / charge	Move and Attack into a foe (slams roll vs DX; the ~4 / skill-cap-9 do not apply). Damage = your thrust crushing . Both of you can be knocked down.
Slam stance SW	+3 to hit & knockback, counts ST +4 for slam damage, and may stun a smaller foe . A rocket-pack burn-charge adds +2 .
Shove	Quick Contest of ST — win = push the foe back 1 hex(more on a big margin). Force Push does this at range.
VEHICLE RAM & COLLISION — (HP ÷ 5) × (RELATIVE SPEED IN HEX/TURN ÷ 10)	
VEHICLE HP \ SPEED	10204080
40 · speeder bike	8163264
80 · landspeeder	163264128
150 · airspeeder	3060120240
300 · walker / tank	60120240480
Both take it	Ram damage applies to both vehicles — a bike ramming at 40 destroys itself. Ramming is a desperation move.
Glancing	Side-swipe = half (DX/Pilot turns a head-on into a glance).
Into a wall	Ramming a stationary object — vehicle takes full , the wall shrugs it off (soft ground: half).
Hitting a person	Full ram damage; they roll DX/Acrobatics at ~2 (fast) / ~4 (extreme) to dive aside for half.
Force-thrown object	Driven into a wall: 1d per 2 hexes of momentum lost.

GRN GRENADES, CHARGES & MINES — AT A GLANCE

(N) after the dice = **armour divisor**. **ex** = explosive (uses falloff, left). **[Nd]** **frag** = secondary shrapnel, **pi** (ignores shields). Timing: **end-of-turn** = goes off at the turn's close · **fixed** = can't be rushed · **instant** = on landing. Full list on the sheet & compendium Codex VI. **SW**

ITEM	BLAST (CENTRE)	RADIUS	TIMING
Fragmentation grenade	6d(1) cr ex + [3d] frag	3 m	end-of-turn
Concussion grenade	5d cr ex (knockback)	3 m	end-of-turn
Plasma / concussion	6d(2) burn ex	3 m	end-of-turn
Thermal detonator	6d÷3(2) burn ex	4 m	instant
Ion grenade (droids)	6d(5) ion ex	3 m	2-sec
Stun grenade	HT~4 aff (stun 1d t)	3 m	end-of-turn
Flash-bang	HT~4 aff (blind+deaf 1d t)	4 m	end-of-turn
Smoke grenade	concealment cloud	4 m	end-of-turn
Cryoban grenade	4d(1) cr + slow	3 m	2-sec
Incendiary grenade	4d burn ex + fire field	3 m	2-sec
Gas grenade (acid)	3d cor/turn cloud	4 m	2~3-sec
Sonic grenade	5d(0.5) son ex + HT~3 stun	4 m	2-sec
Seismic charge	6d÷3(2) cr ex (huge)	6 m	3-sec arm
Plasma/thermal charge	6d÷4(3) burn ex	5 m	3-sec arm

THR THROWING & SCATTER

Skill	Throwing or DX. A grenade is SM 0; use the Size/Speed/Range penalties (Page 2).
Range	Roughly ST × 3.5 m easy (½D), ST × 5 m max. A strong arm throws farther.
Miss → scatter	A missed throw scatters : it lands (margin of failure) hexes away in a random direction (roll 1d for the facing). Work falloff from where it actually lands.
Use the timing	End-of-turn blasts let foes dive this turn; instant (thermal det) gives no warning; fixed-delay can be lobbed to land first.
Cook-off / throw-back	Hold a timed grenade to shorten the fuse (risky). A foe may spend a Ready to throw back one that hasn't gone off.

BLAST SURVIVING AREA ATTACKS — GRENADES & THE INSTANT DETONATOR

You defend a blast **only if you see it coming**, and **no Parry, Block or saber Deflect works against an area attack** — your outs are Dodge, Dive for Cover, hard cover and the Force. **Each** defender in the radius rolls their own.

One Dodge = one ring A normal active **Dodge steps you 1 hex** — that drops you **one column** on the falloff table (centre → ÷3). Against a thermal det (≈63 at centre → ≈21 one hex out) **a single step is rarely enough to live**.

Dive for Cover HOUSE	The real answer. An All-Out-Defence (Dodge) you may take as your Reaction to the throw : roll Dodge or Acrobatics and cross several hexes toward cover in one motion, ending prone . Each hex crossed steps you down another column ; reaching cover then subtracts its DR; Acrobatic Dodge stacks (+2) .
Cover beats everything	Cover DR comes off after falloff — a wall, a corner, a body between you and centre. Diving prone in your own hex doesn't cut the damage but can put cover in the way.
Timing is the killer	End-of-turn nades (frag, concussion, plasma) let foes walk clear on their own turn before the bang — and can be thrown back with a Ready. Instant nades(thermal detonator — blows on landing) give no turn to flee and no throw-back window: your only out is the Reaction Dodge / Dive in that instant. That is why a thermal det "guts a room."
A near-miss still stuns	Even a non-wounding blast: HT vs the centre damage or be stunned (lose your next turn). Sealed armour negates gas; nothing negates concussion.
Force / gear outs SW	Force Push (Special Reaction — shove the device away or throw it back before it blows), Force Jump clear of the radius, or Tutaminis on a plasma / thermal blast (energy only — never frag).

FP FATIGUE, STAMINA & THE FP TRACK	
What FP is	Your stamina pool. Spent on Extra Effort , hard physical skills (swim, climb), holding your breath , and — for Force-users — every Force power . Stun bolts and <i>fatigue</i> damage drain FP, not HP.
Recovery	1 FP per 10 min of rest (no strenuous activity). A full night's sleep refills all. A meal or stim returns some (GM call). Most fights are too short to recover mid-combat — top up before the encounter.
Fit / Very Fit	Recover twice as fast , and carry +1 / +2 FP to spend on top — more stamina, not just a quicker refill.
RUNNING LOW — THE FP THRESHOLDS	
≤ ½ FP	Tired . Move and Dodge halved · ST halved for damage · −2 to all skills.
≤ 0 FP	Running on fumes . Roll HT each turn just to act · DX and IQ halved (round up).
≤ −1× FP	Collapse . Unconscious until FP climbs back above −1× max.

EFF EXTRA EFFORT — SPENDING FP TO PUSH	
One breath of will, one point of stamina. Each costs 1 FP and lasts a single action unless noted.	
Mighty Blows MA	+1 per die of damage (or +2 flat) on one melee attack. How raw muscle hits harder.
Feverish Defense MA	+2 to one active defence. Once per turn; not during Committed / All-Out Attack.
Heroic Charge	Ignore the Move-and-Attack skill-9 cap (or take Committed / AoA on the move) — once per fight .
Lifting / Break free	Lifting ST +2 for one attempt — heave a blast door, bend a bar, snap a grapple .
Sprint	Up to +20% Move this turn (flat 1 FP , no run-up — see RUN).
WHAT STAMINA CAN'T BUY	
There is no spending FP for a better skill or DX roll — Extra Effort sharpens damage, defence, movement and lifting , never your effective skill. To <i>hit</i> better: Aim, Evaluate, Feint, or All-Out Attack. To <i>push</i> ST for a feat: use Lifting, above.	

RUN EXERTION — RUNNING, SWIMMING & THE LONG HAUL	
Ordinary movement is free . Stamina only bleeds when you push past a steady pace or strain for minutes. 1 hex = 1 m, 1 turn = 1 s .	
Walk / Jog	≤ ½ Move. No FP cost — sustainable for hours. Limited by terrain and Hiking, not stamina.
Run	Full Move. No FP cost in a fight; keep it up for minutes. A prolonged all-out run becomes <i>hard exertion</i> , below.
Sprint	Extra Effort: up to +20% Move this turn for a flat 1 FP — no run-up needed (−2 or Bulk to act).
Hard exertion	A long chase, hard swim or climb: roll HT every minute of strain; each fail = −1 FP . Heavy loads or fighting in heat start the clock sooner.
Swim / Climb	Strenuous — the same HT-per-minute drain once you're working, plus the skill roll to make progress.
BREATH & THE ELEMENTS (FULL LIST ON HAZARDS)	
Hold breath	HT × 4 seconds safe, then HT to extend — each fail forces a breath (underwater → you start drowning).
Drowning	HT every 10 s , fail = −1 FP; at 0 FP, 1 HP/turn .
Cold / Heat	HT every minute (cold) / 10 min (heat), fail = −1 FP, then HP.

ENC ENCUMBRANCE — LOAD, MOVE & DODGE	
Basic Lift (BL) = ST × ST ÷ 5 kg — a one-handed overhead heave. Everything you wear and carry counts toward the bands below; armour is the usual culprit.	
None	≤ BL · Move ×1.0 · Dodge / DX 0 . Robes, clothing, a sidearm.
Light	≤ 2× BL · Move ×0.8 · Dodge / DX −1 . Padded or leather, light battle armour.
Medium	≤ 3× BL · Move ×0.6 · Dodge / DX −2 . Scout armour, medium laminate.
Heavy	≤ 6× BL · Move ×0.4 · Dodge / DX −3 . Full plate, heavy battle armour, a Sith juggernaut.
Extra-Heavy	≤ 10× BL · Move ×0.2 · Dodge / DX −4 . Siege loads — beyond practical combat.
The penalty bites DX-based skills too — Acrobatics, Climbing, Stealth — and a loaded fighter starts the exertion clock sooner (see RUN): more weight, faster to tire.	

FREE FREE ACTIONS & THE TURN'S EDGE	
Your turn is one Maneuver + a step , wrapped in things that cost no action. The line that matters: when does a thing become your maneuver?	
FREE — AS MANY AS YOU LIKE, NO ROLL, NO COST	
Speak	A short line — a sentence or two , what fits in one second. A real speech takes several turns.
Drop / let go	Release a weapon or object — instant, free .
Change facing	Turn to a new hex — free with a step or Move ; you can't pivot out of turn except on a Wait.
Step	Shift 1 hex — free with almost any maneuver (not Do Nothing or Change Posture).
THIS IS YOUR MANEUVER — NOT FREE	
Draw · ready · reload · pick up	Weapon in hand, swap grip, reload, lift something off the ground = a Ready maneuver. Your action for the turn.
Stand up	Rising from prone = a Change Posture maneuver.
Use a device	A single touch (button, det trigger) rides along as a Quick Action ; anything fiddlier is a Ready.
OUT OF TURN — SOMEONE ELSE'S TURN	
You still get one active defence per attack you can see (a Reaction), any Wait you pre-set, and — Force-users — one Special Reaction . Everything else waits for your turn. → REACT, p2	

HVV PARRYING HEAVY HITS & THE STRENGTH TO HOLD	
A parry stops a blow by meeting its force . Meet something far heavier than your guard and the guard is driven aside — blade, arm and all.	
HEAVY MELEE WEAPONS	
Parry-heavy	Parrying a two-handed weapon , or one swung with ST 3+ above your weapon's, with a light blade → roll DX (or weapon skill) to keep the parry, or it's beaten aside . Fencing parries suffer most.
Overpower a guard	The attacker can spend muscle to break your defence — a Quick Contest of ST (see BASH). Win and your block weakens or fails.
LIGHTSABER VS BLASTER BOLTS — DEFLECT, REDIRECT, REFLECT	
Deflect (default)	A lit-saber Parry at full skill turns any ordinary bolt — pistol to heavy blaster — to a random hex, no ST roll . A critical parry reflects it back for free. (Cannon-class fire, below, is the exception.)
Redirect (Parry −2)	Steer it to a hex you choose — a wall, the floor, clear of an ally — not a random one. Just lands there; no new attack.
Reflect — back at them (Parry −4)	The bolt becomes your shot at the original shooter : re-roll it on your Lightsaber Parry skill (not theirs), at your range back to them. They defend normally but seldom expect their own bolt, so it lands often. Each parry is separate — a full volley hits the multi-defence cap (−5-6/turn) .
Cannon-class bolts	Assault / blaster cannons, rockets — the Heavy Impact bracket — hit the blade like a battering ram. To hold the Deflect, roll ST at −1 per full 5 points of the bolt's basic damage above your ST . (Average the dice: a 6d cannon ≈ 21.)
Hold (success)	The bolt is turned — but the impact shoves you back 1 hex (more on a big margin).
Beaten aside (fail)	The bolt drives through : it strikes you (with Heavy Impact knockback even if DR stops the wound), and roll DX or the saber is knocked from your grip .
Too big to muscle	Turbolaser-scale fire can't be held . Dodge, take cover, or bleed it with the Force.
The Force way SW	Tutaminis / Deflection soaks the force instead of fighting it — hold up to 4 points of energy per 1 FP . Cheaper than raw ST against the big stuff.
→ Heavy Impact, p1 · Defending vs Ranged, p2	

BASH BASH, SHOVE & OVERPOWERING	
Sometimes the answer is mass, not finesse . Most of this lives on the Velocity page — here's the close-quarters version.	
Slam / charge	Move-and-Attack body-check — thrust crushing scaled by speed; both can go down. → VEL, p3
Shove	A Quick Contest of ST — win and the foe gives a hex (Force Push does it at range). → VEL, p3
Shield bash	Strike with a shield (Shield skill) — thrust crushing: buckler thr−2 , small thr−1 , large thr . A shield rush adds a slam.
Saber Bash SW	With a bonded blade your muscle drives the cut (add your ST swing). The grind : 2 FP on a hit met by any guard → Quick Contest of ST, win and that defence is −1, cumulatively. Reactive (4 FP on a successful Parry): interrupt the attack, knock them back. Useless vs a Dodge.
